Sow Burpee's Guaranteed Seeds

Low in Price—High in Quality

THE greatest possible satisfaction to every customer—that is the Burpee policy which, during the past 58 years, has built up the largest mail order seed business in the world. The hundreds of thousands of old friends who rely year after year on Burpee Seeds offer assurance to new friends that Burpee's Seeds are the best that grow. The founder of this business often said, "I would rather sell nothing than sell a man something that will not fully satisfy him." Luther Burbank, the famous plant wizard, said: "I have had the pleasure of sending many hundreds of customers to you for seeds during the past few years. I always refer anyone asking for seeds to your firm as I consider your house the most reliable seed house in the world, and I think that would be the verdict of the public at large."

Every Vegetable and Flower worth growing is offered in this book. 152 varieties are new this year—the choicest novelties in Vegetables and Flowers that will be a delight to you and the envy of your neighbors and friends. All the older favorites are here too, of course, the best strains yet produced, the highest quality seeds that grow.

Burpee's Seeds Cost No More But are Worth Much More

To have a good garden you must start with good seeds. Burpee does not sell "cheap" seeds—yet Burpee's prices are low—just as low as possible for first quality seeds. This year we have again lowered prices on many varieties. Burpee's seeds cost no more although they are all *tested* and *guaranteed*. Nowhere can you buy such good seeds for less money. Nowhere can you buy better seeds at any price.

You are One of Over A Million Gardeners

who are using Burpee's 1933 Garden Book as a guide in selecting, buying, and planting the best seeds that grow. The vast number of gardeners who, year after year, come back to Burpee for their supply of seeds, bulbs, and plants is convincing evidence of Burpee quality, reliability, and service. Results count. If you have never used Burpee's Seeds before we only ask you to send us a trial order and *compare the results*.

Burpee's Great Seed Farms

To produce the great quantities of Burpee Seeds demanded every year, to maintain the famous Burpee quality, to conduct the trials which thoroughly test all Burpee Seeds before they are supplied to you, three great Burpee seed farms are under constant cultivation by large staffs of experts, who work constantly to fulfill the Burpee promise of giving you the best seeds that grow.

Through careful testing we are able to supply you with seeds of known quality . . . seeds that can honestly be guaranteed to grow . . . seeds that will give you the greatest returns from your investment and labor. Fordhook Farms Doylestown, Pa.

Extending around and right into beautiful old Doylestown are the 800 acres of Fordhook Farms. Here are the largest and most complete trial grounds in the world where all Burpee Seeds are thoroughly tested to prove that they meet the Burpee standard. Here, also, is produced the seed of many special strains of Vegetables and Flowers. After a visit to Fordhook Farms, Luther Burbank wrote us: "Your Fordhook Trial Grounds were the best of all my eastern object lessons. I had no idea of their extent and value, not only to yourselves but to your customers, and eventually to everyone who cultivates the soil." Fordhook is an interesting place to visit whether you have a garden or not.

Floradale Farms Lompoc, Calif.

Hundreds of acres in the fertile Lompoc Valley, located about 30 miles north of Santa Barbara, comprise Floradale Farms. Here under ideal conditions of soil and climate are produced the world-famous Burpee Sweet Peas, many other varieties of Flower Seeds, and special varieties of Vegetable Seeds. The rich deep soil, the moderate climate, and the heavy night dews that prevail during the larger part of the growing season all combine to give the seeds grown here exceptional vigor, vitality, and hardiness. Floradale Farms are famous as a point of interest in California and are visited yearly by hundreds of people interested in flowers. There is always something to see on Floradale.

You are cordially invited to visit the Burpee Flower Gardens on Route 611 leading from Philadelphia to Easton and hence into the Poconos. Doylestown is 24 miles directly north of Philadelphia.

Early May indicates the time when late trees, such as Oaks, are coming into leaf and all danger of frost has passed. With us the first light frosts are bound to occur early in October and the first killing frost may be expected the middle of October.

Mary Washington Asparagus

Burpee's Vegetables

Burpee's Annual contains a complete list of the best varieties of Vegetables suited for growing in the home garden and for market. You can depend upon the descriptions given in this book because they have been written for the purpose of guiding you in selecting the varieties best suited for your purpose. Burpee's Vegetable Seeds are guaranteed to grow and give entire satisfaction, or you may ask, within a year, to have your money refunded. Grow plenty of fresh wholesome vegetables to supply your table throughout the season.

ASPARAGUS

Well-drained soil and a southern exposure produce the earliest and best crops of Asparagus. For small plantings we recommend the use of roots because they will give quicker returns. It is best not to cut the one-year-old roots until the second year after planting; the two-year-old roots will produce a limited crop the following spring after they have been set out. One oz. of seed will sow 40 ft. of row. 2 lbs. are needed to produce enough roots to set out one acre. Plant Asparagus in fertile soil and keep the crop cultivated throughout the season.

Mary Washington ◉

A Most Reliable, Almost Rust-Proof Asparagus

This variety of Asparagus is so superior to all other varieties that it has completely replaced them, both in the home garden and for market. It originated and was selected by the United States Department of Agriculture, Washington, D. C. The plants form large clean shoots which are thick and heavy. They are long and straight, with closely folded tips. The color is a rich dark green with still deeper green tips. It is a heavy yielder and a long-lived producer of exceptionally fine quality. It has proved to be practically rust-free. The performance of the mother plant of Mary Washington Asparagus, which is still growing in the trial grounds of the Department of Agriculture, is ample proof of the hardiness and longevity of this wonderful Asparagus. Like all varieties of Asparagus, it gives the best results if planted on land which has been enriched with well-rotted stable manure. In order to insure large yields for many years, cuttings should not be too severe during the first season or two after planting the roots. To insure a continuous yield, give the beds a top-dressing of well-rotted manure soon after cutting has ceased.

9 Mary Washington Seed This seed has been saved from extra-strong true-to-type plants of this remarkable Asparagus. Will give a light cutting in three years. Pkt. 10¢; oz. 15¢; 4 ozs. 40¢; ½ lb. 60¢; 1 lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00.

9950 One-Year-Old Roots of Mary Washington

The one-year-old roots are usually preferred by home gardeners and market growers as they are easy to plant and take hold of the soil quickly. Space the roots 2 ft. apart in the row. 50 for \$1.15; 100 for \$2.00, postpaid. Not prepaid: 1000 roots \$11.00; 5000 roots \$50.00.

9951 Two-Year-Old Roots of Mary Washington

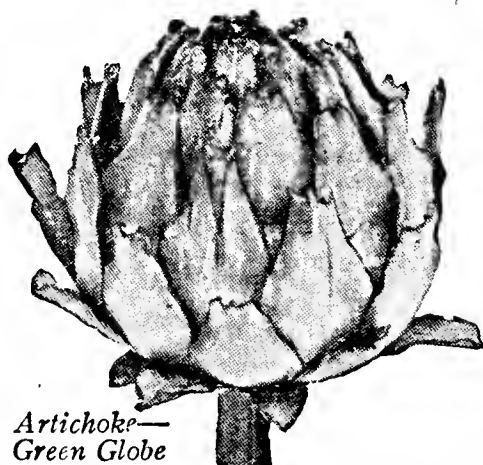

These will give a light cutting during the coming season and can be cut in the regular way the second year after they are planted. Plant 2 ft. apart in the row. 50 for \$1.35; 100 for \$2.50. Not prepaid: 1000 roots \$12.00; 5000 for \$55.00.

Follow the Bull's Eye

We have used this mark ◉ for years to guide the gardener in the selection of varieties which we believe will give the best results under varied conditions of soil and climate. This mark ◉, usually called a bull's eye, was used by the ancient alchemists to represent gold. It therefore is most appropriate for indicating the varieties which we consider the best of their class. If you are not thoroughly posted which varieties to choose as the most suitable for your particular section, we recommend that you make your selection primarily from those marked with the bull's eye.

◉ **Good as Gold** ◉

*Artichoke—
Green Globe*

Artichoke 1 Green Globe

This tasty vegetable is gaining favor rapidly. It is a perennial which will persist for many years and continues to give a good crop if grown on well-drained rich soil. It is cultivated for its flower-buds, which are cooked like Asparagus. Besides the meat which is attached to the base of each bud scale, the bottom of the bud has a delicate, pea-like flavor. Pkt. 15¢; ½ oz. 35¢; oz. 50¢; 4 ozs. \$1.50; ½ lb. \$2.75; 1 lb. \$5.00.

Burpee's Pole Beans

Kentucky
Wonder

Pole Beans are extremely productive. They come into bearing later than the Bush varieties, but bear for a longer period, and some produce bigger pods. They are less hardy than Bush Beans and are therefore planted a week later. They mature in from 70 to 85 days. Sow the seed when the weather has warmed up, about the second week of May and not later than June 15. Set poles 4 ft. apart and place 8 to 10 beans around each; 1 pound of seed for 125 poles. Or, the seed may be planted along a trellis, sowing 300 ft. of row with 1 lb. of seed. Pick the beans before they have reached full size.

72 Kentucky Wonder ☉ or Old Homestead

We prefer this to most other green-podded Pole Beans. It is early, climbs well, and bears a fine crop of **large green pods**, 7 to 9 in. long. Pods are thick and meaty, **tender, brittle**, and of good quality, showing slight strings as the pods reach full size. They are excellent for table if used before they reach their full size. Though thick they appear slender on account of their great length. The pods are distinctly curved. Seeds are brownish drab. Pkt. 10¢; ½ lb. 25¢; 1 lb. 35¢; 2 lbs. 55¢; 5 lbs. \$1.15; 10 lbs. \$2.05, postpaid. Not prepaid: 15 lbs. \$2.25; 25 lbs. \$3.50; 50 lbs. \$6.50; 100 lbs. \$12.00.

73 Burger's Stringless Green-Pod ☉

Also called White-Seeded Kentucky Wonder. A most desirable variety with straight pods 6 to 8 inches long; rich green, very meaty, and **entirely stringless**. This bean is of German origin and has a most delightful tasty flavor. It combines attractive appearance with productiveness and first-class quality. The white beans are fine for winter use. Pkt. 10¢; ½ lb. 25¢; 1 lb. 35¢; 2 lbs. 55¢; 5 lbs. \$1.20; 10 lbs. \$2.15, postpaid. Not prepaid: 15 lbs. \$2.40; 25 lbs. \$3.75; 50 lbs. \$7.00; 100 lbs. \$13.00.

75 Lazy Wife's Green pods from 4½ to 6 in. long. Broad, flat, and stringless. Round white beans. Pkt. 10¢; ½ lb. 25¢; 1 lb. 35¢; 2 lbs. 60¢; 5 lbs. \$1.25; 10 lbs. \$2.25, postpaid. Not prepaid: 15 lbs. \$2.55; 25 lbs. \$4.00; 50 lbs. \$7.50; 100 lbs. \$14.00.

74 White Creaseback The green pods are 6 in. long, round, deeply creased or saddle-backed. The white seeds are fine for baking. Pkt. 10¢; ½ lb. 25¢; 1 lb. 35¢; 2 lbs. 55¢; 5 lbs. \$1.20; 10 lbs. \$2.15, postpaid. Not prepaid: 15 lbs. \$2.40; 25 lbs. \$3.75; 50 lbs. \$7.00; 100 lbs. \$13.00.

78 McCaslan Pods are of a rich dark green color; 8 in. long, flat, curved, and of good quality. It is an extra fine pole bean of remarkable hardiness. Another point in its favor is its earliness, while it is also quite productive. The flesh is brittle and fine grained, showing slight strings as the pods reach full size. The seeds are small, of oblong shape, and of a pure white color. Pkt. 10¢; ½ lb. 25¢; 1 lb. 40¢; 2 lbs. 70¢; 5 lbs. \$1.25; 10 lbs. \$2.25, postpaid. Not prepaid: 15 lbs. \$2.55; 25 lbs. \$4.00; 50 lbs. \$7.50; 100 lbs. \$14.00.

91 Yard Long Grown mostly as a curiosity. Long, slender, round pods, 2 ft. or more in length; tender when young. Seeds are brown. Pkt. 15¢; ½ lb. 45¢; 1 lb. 75¢; 2 lbs. \$1.40; 5 lbs. \$3.50; 10 lbs. \$5.40, postpaid.

83 Horticultural, Cranberry, or Wren's Egg The pods when young are of excellent quality and make fine snapshorts. They measure 5 to 6 in. long and are entirely stringless. The dried beans are grown extensively for winter use. They are large, of a light fawn color, speckled with dull red. Highly recommended as a baking bean. Pkt. 10¢; ½ lb. 25¢; 1 lb. 35¢; 2 lbs. 55¢; 5 lbs. \$1.20; 10 lbs. \$2.15, postpaid. Not prepaid: 15 lbs. \$2.40; 25 lbs. \$3.75; 50 lbs. \$7.00; 100 lbs. \$13.00.

87 Scarlet Runner Bears large and showy sprays of bright scarlet flowers. Often grown for ornament. The pods are tender and tasty while young. Pkt. 10¢; ½ lb. 25¢; 1 lb. 45¢; 2 lbs. 80¢; 5 lbs. \$1.40; 10 lbs. \$2.60, postpaid. Not prepaid: 15 lbs. \$3.00; 25 lbs. \$4.75; 50 lbs. \$9.00; 100 lbs. \$17.00.

Two Splendid Wax Pole Beans

79 Golden Cluster Wax ☉ Sweet, tasty, and brittle

Among the Wax-Podded Pole Beans, we recommend first Golden Cluster Wax. Pods 6½ to 7½ in. long; perfectly straight and flat. The flesh is brittle and of fine quality. Pods are a **light waxy yellow** color. Do not show any strings until they reach maturity. White-seeded. Pkt. 10¢; ½ lb. 25¢; 1 lb. 40¢; 2 lbs. 70¢; 5 lbs. \$1.30; 10 lbs. \$2.40, postpaid. Not prepaid: 15 lbs. \$2.70; 25 lbs. \$4.25; 50 lbs. \$8.00; 100 lbs. \$15.00.

Burpee's GREEN

Beans are one of the most satisfactory and productive vegetables because they grow so vigorously and bear with such wonderful abundance. Plants of the Bush Beans range from 15 to 20 in. tall. Seed cannot be sown until the weather is quite warm. In the vicinity of Philadelphia, early May is about the right time for the first sowing of bush beans. A warm, well-drained, sandy loam is best suited. The beans are most delicious if they are picked

BUSH Beans

before they have reached full size, and the plants will continue bearing much longer. The early varieties mature in from 45 to 65 days.

To provide for a continuous supply, seed should be sown every 10 to 14 days up to August 10th. Where summers are hot and dry, sow up to the end of May and again from July 15th to August 10th. Plant in rows not less than 18 in. apart, cover with 2 in. of soil, and firm the surface to assist germination. One pound of seed sown thinly fills a row 250 ft. long; usually 90 lbs. of seed are sown per acre.

Another Particularly Fine Variety

22 Burpee's Fordhook Favorite Ⓞ

A White-Seeded Stringless Green-Pod

Burpee's Fordhook Favorite has been acclaimed the finest white-seeded Stringless Green-Pod Bush Bean in existence. It greatly resembles Burpee's Stringless Green-Pod, but its pods are somewhat straighter. They measure $5\frac{1}{2}$ to $6\frac{1}{2}$ in. long and are about $\frac{1}{2}$ in. thick and $\frac{1}{2}$ in. wide. They are so full and fleshy that they are practically round. Always perfectly stringless, extremely brittle, and juicy. The well-branched bushes grow 18 to 20 in. tall and bear an enormous crop. Pkt. 15¢; $\frac{1}{2}$ lb. 25¢; lb. 45¢; 2 lbs. 85¢; 5 lbs. \$1.55; 10 lbs. \$2.90, postpaid. Not prepaid: 15 lbs. \$3.45; 25 lbs. \$5.50; 50 lbs. \$10.50; 100 lbs. \$20.00.

27 Tendergreen Ⓞ

This is a new Bush Bean of utmost value. The plants make a strong and vigorous growth. They are well branched and carry a great quantity of beautiful light green beans. The pods grow 7 in. long. They are round, extremely meaty, and tender. Even when fully grown they are absolutely stringless. We are convinced that this will be one of the leading beans in years to come. It somewhat resembles Full Measure but represents a decided improvement upon that popular variety. You should at least give it a trial this year. Pkt. 15¢; $\frac{1}{2}$ lb. 25¢; lb. 45¢; 2 lbs. 75¢; 5 lbs. \$1.30; 10 lbs. \$2.40, postpaid. Not prepaid: 15 lbs. \$2.70; 25 lbs. \$4.25; 50 lbs. \$8.00; 100 lbs. \$15.00.

15 Black Valentine

Here is a Bean which has proved extraordinarily profitable because it matures early and is very productive. The plants are more vigorous than those of Red Valentine and the pods are a deeper green color. They measure 6 in. long, are slender, quite round, and straight. The flesh is fine-grained and somewhat fibrous. The pods also show some strings but their attractive appearance makes them a good market variety. Pkt. 10¢; $\frac{1}{2}$ lb. 25¢; lb. 35¢; 2 lbs. 50¢; 5 lbs. \$1.10; 10 lbs. \$1.95, postpaid. Not prepaid: 15 lbs. \$2.10; 25 lbs. \$3.25; 50 lbs. \$6.00; 100 lbs. \$11.00.

32 Stringless Black Valentine Ⓞ

With the introduction of this new stringless variety the old Black Valentine is likely to fall into discard sooner or later. Stringless Black Valentine produces a great crop of attractive pods 6 in. in length. They are, however, not quite so round as those of the old type but decidedly more desirable because they are entirely stringless at all stages. Pkt. 15¢; $\frac{1}{2}$ lb. 25¢; lb. 45¢; 2 lbs. 75¢; 5 lbs. \$1.30; 10 lbs. \$2.40, postpaid. Not prepaid: 15 lbs. \$2.70; 25 lbs. \$4.25; 50 lbs. \$8.00; 100 lbs. \$15.00.

14 Extra-Early Red Valentine

(Improved Round-Pod Strain)

An attractive variety which, however, has strings. It is a market sort not often selected by the home gardener, though the plants have proved to be decidedly blight resistant and early maturing. The pods are 6 in. long, round, straight, and of an attractive dark green color. Pkt. 10¢; $\frac{1}{2}$ lb. 25¢; lb. 35¢; 2 lbs. 50¢; 5 lbs. \$1.10; 10 lbs. \$1.95, postpaid. Not prepaid: 15 lbs. \$2.10; 25 lbs. \$3.25; 50 lbs. \$6.00; 100 lbs. \$11.00.

SHELL BEANS—For Use As Dried Beans During Winter Season

Extensively grown everywhere for use as dried beans. The small-seeded varieties, like Robust Pea Bean, are sown at the rate of 30 to 45 lbs. per acre. The larger-seeded varieties require 60 to 75 lbs. per acre; 1 lb. for 150 to 200 ft. of row. Shell Beans possess high nutritive value, due to their large percentage of protein. In addition to the varieties listed below, the seeds of any of the other beans offered by us can be used for baking, though the white-seeded varieties are very much more preferred for this purpose due to their attractive appearance. Shell Beans should be left on the vines until they are thoroughly matured and dried out before they are put away for winter use.

26 Dwarf Horticultural—Stringless This is an excellent double-purpose variety with thick, flat pods 5 in. long. As they are entirely stringless they are fine for snap and green-shell purposes. Light buff seeds, spotted red. Pkt. 10¢; $\frac{1}{2}$ lb. 25¢; lb. 35¢; 2 lbs. 60¢; 5 lbs. \$1.25; 10 lbs. \$2.25, postpaid. Not prepaid: 15 lbs. \$2.55; 25 lbs. \$4.00; 50 lbs. \$7.50; 100 lbs. \$14.00.

25 Robust Pea Bean or Improved White Navy An improved, prolific, disease-resistant strain of the popular small white baking bean. Pkt. 10¢; $\frac{1}{2}$ lb. 25¢; lb. 30¢; 2 lbs. 50¢; 5 lbs. \$1.00; 10 lbs. \$1.75, postpaid. Not prepaid: 15 lbs. \$1.80; 25 lbs. \$2.75; 50 lbs. \$5.00; 100 lbs. \$9.00.

29 White Marrowfat

Plants are dwarf, producing a few runners. They grow 14 to 18 inches tall, are hardy, very vigorous, and productive. Pods are large, flat, straight, and filled with 5 to 7 large white seeds highly valued for baking. Pkt. 10¢; $\frac{1}{2}$ lb. 25¢; lb. 35¢; 2 lbs. 55¢; 5 lbs. \$1.15; 10 lbs. \$2.05, postpaid. BUSH Beans

applies to the Wax Beans as well. The bushes range in size from 12 to 20 in. tall. Maturity dates vary from 45 to 65 days. In dry seasons and poor soil, plants will come into bearing more quickly than in moist seasons and fertile ground, but the crop will be less abundant. Be sure to make succession plantings every two weeks for a continuous supply, and pick the pods before they reach full size to keep the plants bearing.

Oconomowoc, Wisconsin

W. Ailee Burpee Co.:

You will be interested, perhaps, in the photo sent herewith showing what Burpee's Giant Pole Beans will do. The vines are now twenty feet high on the poles, and are still climbing. The Tomato plants shown in photo average nine and ten feet high.

We think Burpee's Seeds are the best, and have used them for twenty years. We know Burpee's Seeds grow.

My 100 x 100 ft. home garden last summer yielded enough to supply a family of seven with fresh vegetables all summer, and permitted the storing for winter of ten bushels of Potatoes and a good supply of Carrots, Parsnips, Onions, Celery, Turnips, etc.

DR. LYNFORD LARDNER

Burpee's BUSH LIMA Beans

Lima Beans are a tender vegetable and the seed must not be planted until the nights have become quite warm. The middle of May is usually safe in the vicinity of Philadelphia. Bush Limas are good yielders, maturing in from 65 to 90 days, according to the variety. Plant in a warm, well-drained, sandy loam. Stick the seeds edgewise, eye down, 5 in. apart in the row, and cover 2 in. deep with fine soil. One pound will sow 150 ft. of row. Keep the soil well cultivated, and pick the pods as soon as the beans have reached edible size.

63 Burpee Improved Bush Lima

A wonderful improvement over the original Burpee Bush Lima—larger pods, bigger beans, greater yield, and fully 8 days earlier. The pods are enormous, borne profusely in clusters of from 5 to 8, and crowded with four or five appetizing beans. Burpee's Improved Bush Lima is the largest podded and most prolific of the Bush Limas. The pods are 5 to 6 in. long; 1 1/4 in. wide. Even when fully matured the beans are of luscious flavor. The plants make a uniform, vigorous, upright growth, with heavy foliage. The pods are borne in clusters held well above the foliage. Full-grown bushes measure 30 in. in height and 24 in. across the top. Matures in 85 to 90 days after sowing. Pkt. 10¢; 1/2 lb. 25¢; 1 lb. 45¢; 2 lbs. 85¢; 5 lbs. \$1.65; 10 lbs. \$3.05, postpaid. Not prepaid: 15 lbs. \$3.75; 25 lbs. \$6.00; 50 lbs. \$11.50; 100 lbs. \$22.00.

66 Burpee's New Philadelphia Bush Lima

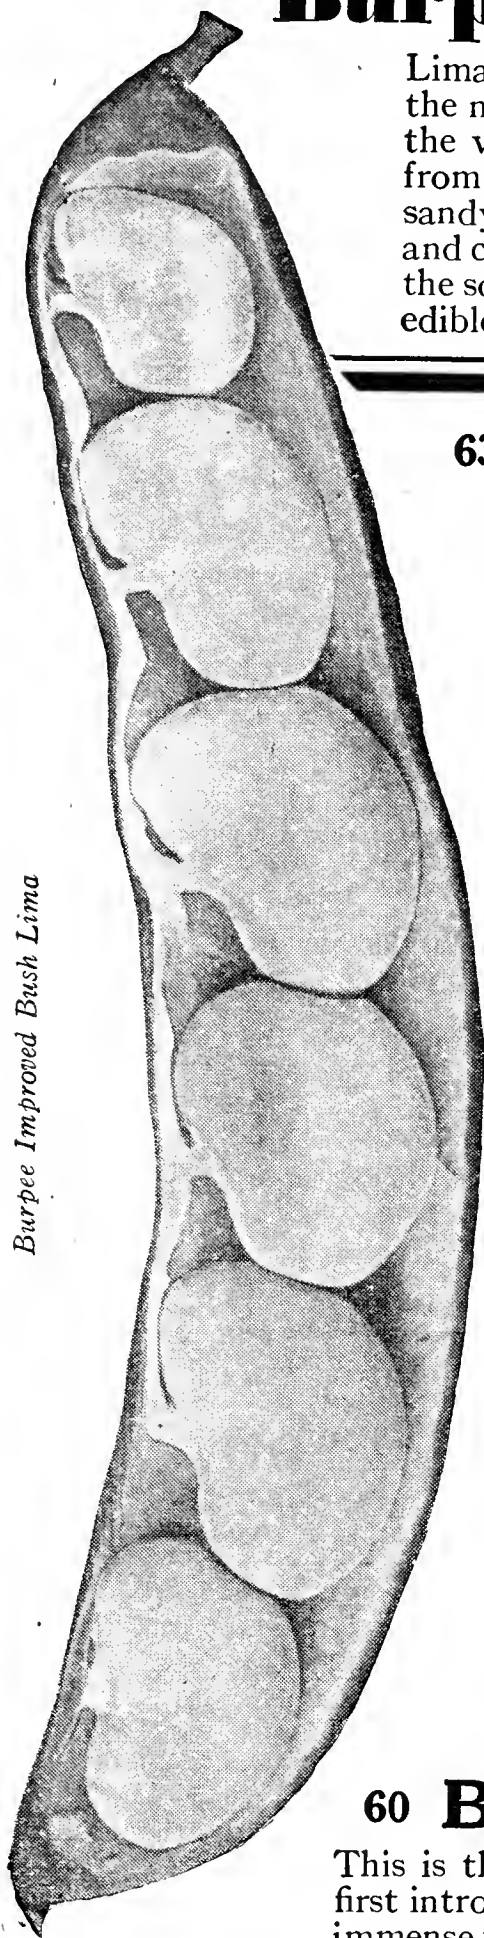

This excellent Burpee variety is of special value because it matures extremely early. The plants are of upright habit and produce pods with the greatest abundance. The earlier pods are set quite close to the ground. Clusters of 6 to 8 pods are usual. The individual pods are 4 1/2 in. long and 1 1/8 in. wide, each containing four fair-sized beans of splendid quality. Southern planters will find that it surpasses the Sieva or Butter Bean, whereas northern planters will benefit from its earliness and productiveness. Pkt. 15¢; 1/2 lb. 30¢; 1 lb. 50¢; 2 lbs. 90¢; 5 lbs. \$1.80; 10 lbs. \$3.35, postpaid. Not prepaid: 15 lbs. \$4.20; 25 lbs. \$6.75; 50 lbs. \$13.00; 100 lbs. \$25.00.

60 Burpee's Bush Lima

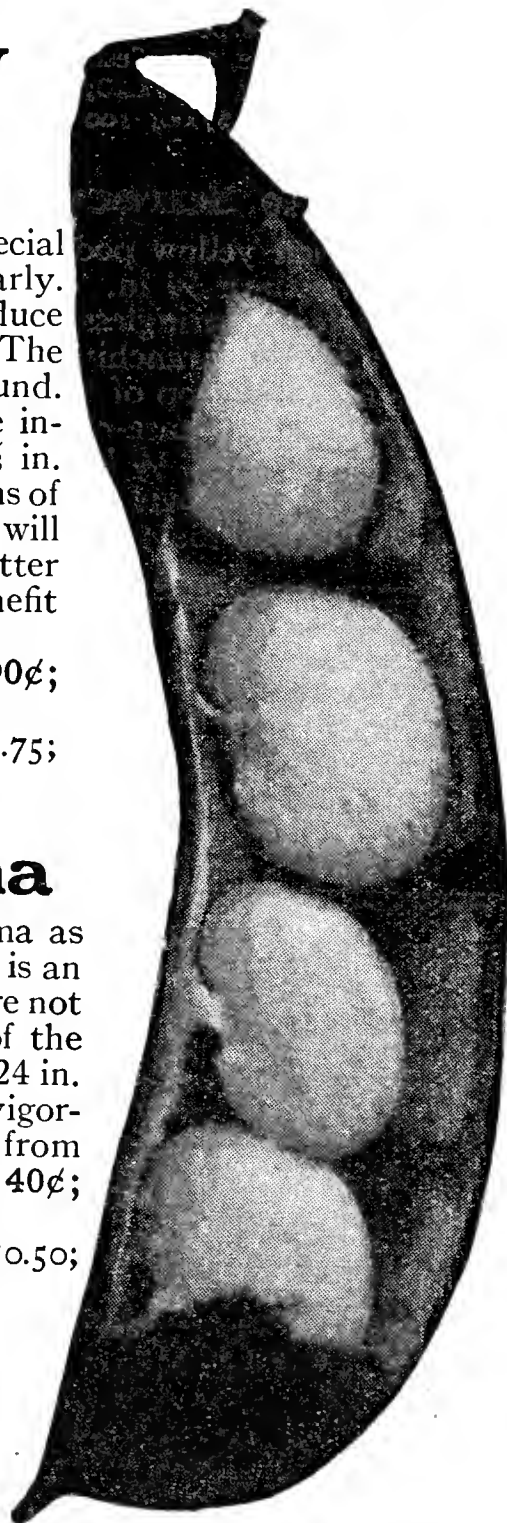

This is the original dwarf, large-seeded Bush Lima as first introduced exclusively by Burpee in 1890. It is an immense yielder. The pods and beans, however, are not so large, nor are the bushes so prolific as those of the Burpee Improved Bush Lima. The bushes, 18 to 24 in. tall, are of stout, erect growth, yet branching so vigorously that each plant develops into a rounded plant from 2 to 3 ft. in diameter. Pkt. 10¢; 1/2 lb. 25¢; 1 lb. 40¢; 2 lbs. 75¢; 5 lbs. \$1.55; 10 lbs. \$2.90, postpaid. Not prepaid: 15 lbs. \$3.45; 25 lbs. \$5.50; 50 lbs. \$10.50; 100 lbs. \$20.00.

68 Wood's Prolific

or **Improved Henderson Bush Lima** This variety is one of the earliest Bush Limas, maturing in from 65 to 75 days, second only to Burpee's New Philadelphia. It belongs to the class of Small Limas. Grown in the South under the name of "Butter Beans." Very hardy, maturing a week before Burpee's Bush Lima, and valuable for growing in the North. The green shell beans are of delicious, sweet flavor. Pkt. 10¢; 1/2 lb. 25¢; 1 lb. 35¢; 2 lbs. 60¢; 5 lbs. \$1.25; 10 lbs. \$2.25, postpaid. Not prepaid: 15 lbs. \$2.55; 25 lbs. \$4.00; 50 lbs. \$7.50; 100 lbs. \$14.00.

Burpee Improved Bush Lima

Burpee's New Philadelphia Bush Lima Bean

65 Burpee's Fordhook Bush Lima

The Most Popular of All Bush Lima Beans

Another Burpee introduction that vies with Burpee's Improved Bush Lima for first place in quality and popularity. Burpee's Fordhook Bush Lima is in a class by itself. It is a bush type of the popular "Potato" Lima. The pods are borne in "clusters" of from 4 to 8 each. The individual pods are 4 to 5½ in. long, 1¼ in. wide, and as much as ¾ in. thick. Each pod holds 4 or 5 large, plump beans. The flavor of Fordhook is delicious, not unlike chestnuts. The plants grow 20 to 30 in. tall and make a spread of almost 2 ft. The strong, upright bushes withstand both whipping rains and strong winds to a remarkable degree. Because of its extra-early maturity, Fordhook will bear profusely even where the summers are comparatively short. Pkt. 15¢; ½ lb. 30¢; 1 lb. 50¢; 2 lbs. 95¢; 5 lbs. \$2.05; 10 lbs. \$3.85, postpaid. Not prepaid: 15 lbs. \$4.95; 25 lbs. \$8.00; 50 lbs. \$15.50; 100 lbs. \$30.00.

Burpee's POLE LIMA Beans

Pole Lima Beans greatly outyield the bush varieties per square foot of garden; but they require poles or other supports, and mature considerably later. Place 6 to 8 seeds edgewise, with the eye downward, around each pole after the nights have become quite warm. One pound of large-seeded varieties for 75 poles.

98 Burpee's Giant Podded

*Burpee's
Giant Podded*

The largest podded of all Pole Limas. The pods measure from 7 to 8½ in. in length and from 1½ to nearly 2 in. in width. The green shell beans are extra large, and are invariably of superb flavor. The vines easily attain a height of from 10 to 12 ft. The pods are produced freely, in clusters of from 4 to 8, until the vines are killed by frost. It is an outstanding variety in many ways and hence enjoys great popularity with many gardeners. Due to their heavy yield the plants require stout poles or posts as supports. 95 Burpee's Sunnybrook

The popularity of this fine Pole Lima Bean is due to its extreme earliness and tremendous yield, each spike carrying from 5 to 10 pods of large size. The pods are closely packed with 4, and often 5, large, thick, meaty, light green beans of the finest quality. It is considerably earlier in producing pods ready for picking than any other large-seeded Pole Lima. The vines are of very vigorous growth. 96 Early Leviathan

An early, hardy, and most prolific Pole Lima Bean producing a handsome crop of large pods soon after Burpee's Sunnybrook Pole Lima. It is extremely productive, due to the fact that the pods are borne continuously from early until late in the season. The pods differ from those of other Pole Limas in being straighter and longer. They contain 3 or 4, and sometimes 5, large, luscious beans each. Pkt. 10¢; ½ lb. 25¢; 1 lb. 40¢; 2 lbs. 75¢; 5 lbs. \$1.35; 10 lbs. \$2.50, postpaid. Pkt. 10¢; ½ lb. 25¢; 1 lb. 35¢; 2 lbs. 60¢; 5 lbs. \$1.25; 10 lbs. \$2.25, postpaid. Not prepaid: 15 lbs. \$2.55; 25 lbs. \$4.00; 50 lbs. \$7.50; 100 lbs. \$14.00.

*Burpee's
Extra Early*

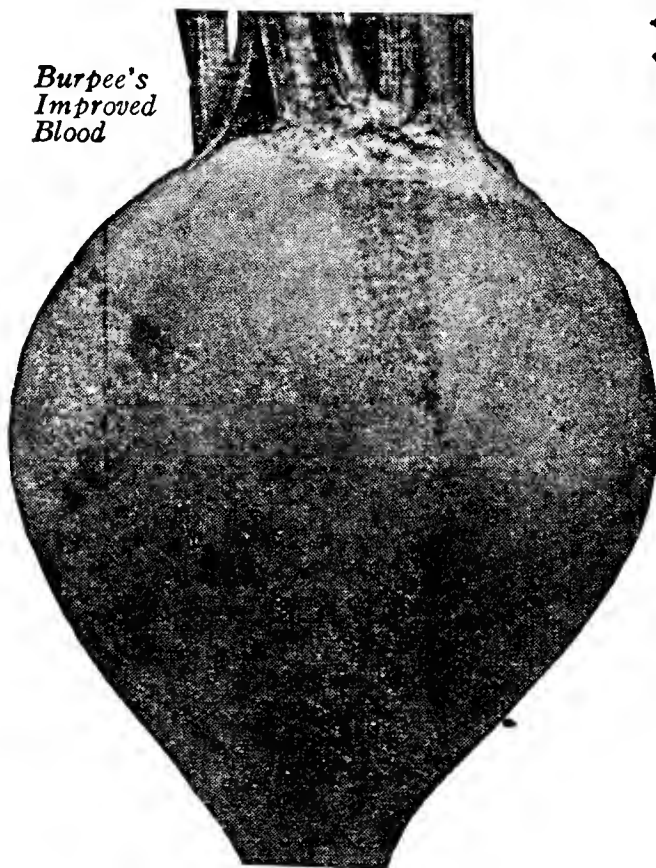

107 Burpee's Extra Early ☉

This is an excellent, very early Beet with attractive smooth roots of a somewhat flattened but very regular shape. It is highly esteemed because it will form roots quicker than any other Beet we have ever grown. In cross-section the Beets show alternate rings of light and dark pink, presenting a most attractive appearance when served on the table. It enjoys the greatest popularity on account of its particularly sweet and tasty flavor. Produces a small quantity of tops which makes it possible to grow it in rows spaced as close as 10 in. apart. Fine for hothouse forcing. Pkt. 10¢; oz. 15¢; 4 ozs. 40¢; ½ lb. 60¢; lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00.

*Burpee's
Improved
Blood*

128 Burpee's Improved Blood ☉

This variety matures a few days after Burpee's Extra Early but excels it in color and is of even finer and sweeter flavor. The roots are round but sometimes inclined to be deeper than their diameter. The flesh is a beautiful dark red color which is well retained when the Beets are cooked. Though it is a quick grower, the roots will keep a long time in storage, but they are sweetest if cooked soon after they are taken out of the ground. A splendid variety for the home garden and for market. Pkt. 10¢; oz. 15¢; 4 ozs. 40¢; ½ lb. 60¢; lb. 95¢; 2 lbs. \$1.70; 5 lbs. \$4.05; 10 lbs. \$7.10.

Burpee's Beets

In order to provide a continuous supply of young tender Beets make repeated sowings throughout the season. Start the first sowing early in the spring as soon as the ground can be worked into good condition. Follow this with other sowings made every 3 to 4 weeks apart up to the end of July. Early in July make a large sowing to produce full-size roots for winter storing. Gather the roots with the approach of cold weather and keep in a cool cellar, packing them in slightly moist earth. Place the rows 12 in. apart and use one oz. of seed for 100 ft. of drill. Thin to stand 3 to 4 in. apart before the plants begin to crowd one another. 4 to 6 pounds of seed are needed to sow one acre in drills. The early varieties mature in 50 to 60 days; the midseason and late varieties require 70 to 100 days.

The flavor and quality of the sprouts are greatly improved by frost. Sow the seed thinly in drills early in June and transplant to rows 3 to 4 ft. apart in the garden or field. When the sprouts begin to form, remove the lower leaves to force all nourishment sent to the lower stem into the sprouts. One oz. of seed sows 500 ft. of row. Requires 125 days to mature.

(M) Here is a widely known variety of Cabbage which has proved to do well under varied conditions of soil and climate. It is a midseason variety, similar in many ways to Premium Flat Dutch but is quite a few days earlier. The heads are not quite so large as those of the late strain but they are compact and heavy, being carried on a medium stem. We have an excellent strain of this foremost Cabbage which has made a reputation for itself in sections where Cabbage is grown in reputation for market and for sauerkraut. Always gives a heavy yield if grown under proper conditions and is most reliable. Pkt. 10¢; oz. 25¢; 4 ozs. 75¢; ½ lb. \$1.15; 1 lb. \$2.00; 2 lbs. \$3.70; 5 lbs. \$9.00.

174 Wisconsin Hollander (L) This late Cabbage belongs to the "Yellows-resistant" group and has become a foremost variety in sections where this disease prevents growing of non-resistant Cabbage. It has been developed from the famous Danish Ballhead but requires about 10 days longer to come to maturity. The plants are larger than Ballhead, and where conditions are favorable will produce a heavier yield per acre. When fully mature the heads are sometimes slightly flattened on top. (L) This midseason Savoy Cabbage is the best variety in this class. It enjoys great popularity on account of its tasty flavor, which is sweeter and more delicate than that of ordinary Cabbage. The large heads are round as a ball and very heavy. The deep green, crinkled outer leaves enclose the tender, light green heart. It matures late in the fall and will keep all winter long. Chinese or Celery Cabbage

Chinese Cabbage has found its way into a large number of American gardens because it is a wholesome and tasty vegetable either cooked or raw. It may be served like Lettuce, or when shredded makes a delicious cole slaw. Boiled, it is far more palatable than ordinary Cabbage. Where summers are cool it may be sown in spring, but in the vicinity of Philadelphia seeds sown early in August have proved to give the best results. Makes full-size heads in 60 to 75 days after sowing. May be stored for about two months. Ask for free cultural directions.

Wong Bok

211 Wong Bok A particularly desirable variety with short, broad, tightly folded, well-blanching heads. Juicy, and of agreeably pungent flavor. The heads are 8 to 10 in. high and very broad. Pkt. 10¢; oz. 30¢; 4 ozs. 85¢; ½ lb. \$1.25; 1 lb. \$2.25; 2 lbs. \$4.20; 5 lbs. \$10.10.

Burpee's Celery

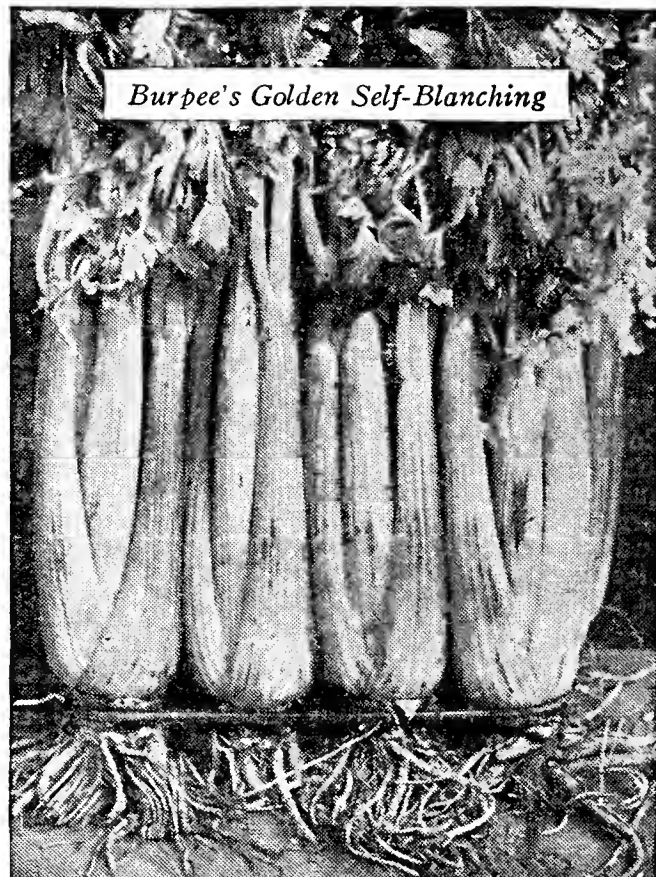

For the earliest crop start the seed in a hotbed or in the house during February or March. For the fall or main crop, sow the seed in the open ground as early in the spring as the soil can be worked into good condition. They will be ready for setting in rows in July. Celery requires a rich, well-manured soil and plenty of moisture so that it can make a continuous growth. Soil, boards, or paper cylinders may be used to blanch the stalks. One oz. of seed is sufficient for 600 ft. of drill. One oz. sown in the seed-flat gives 8,000 to 10,000 good strong plants; 2 ozs. are needed for planting one acre.

The early (E) varieties of Celery mature in about 120 days from the time the seed is sown. They are adapted for starting indoors, or outdoors when the ground is fit for planting. The late (L) Celeries need 140 days to come to maturity. They are planted extensively for late fall use and winter storing, although many of the early varieties also store quite well.

262 Burpee's Golden Self-Blanching Selected French-Grown Seed Original Dwarf Strain

(E) There are many growers who insist on having the original French-grown seed of this foremost Celery though it is somewhat more expensive than the American-grown seed offered below. The plants make a compact dwarf growth and form thick, solid, heavily ribbed stalks which blanch easily into a beautiful clear waxen yellow color. The quality of this variety is superb. The stalks and heart are crisp, solid, heavy, free from any strings, and of the most delicious flavor. It is a standard market and shipping variety, growing 14 to 18 in. tall. Imported seed grown specially for us in France.

oz. \$1.00; 4 ozs. \$3.00;
½ lb. \$5.50; 1 lb. \$10.00.

260 Golden Self-Blanching

(E) This is the American-grown seed produced from the dwarf French-grown stock as offered above. It exhibits all the excellent qualities of the original stock and is sown extensively by home gardeners as well as by market growers. The dwarf compact plants are heavy and solid. The heart is large, tender, well blanching, solid, and has a delightful nutty, crisp, and juicy flavor. It will yield a good crop of attractive Celery if grown under average conditions suitable for this crop. Pkt. 10¢; ½ oz. 25¢; oz. 45¢; 4 ozs. \$1.35; ½ lb. \$2.45; 1 lb. \$4.50.

264 Tall Golden Self-Blanching

(E) This new tall French strain was selected from Burpee's Golden Self-Blanching Celery but differs from the original stock by making a decidedly heavier and taller growth. The plants are vigorous and grow quickly. The foliage is also quite distinct and has been bred for disease resistance. Suited for home growing and market, though not as easily packed for shipping on account of its larger size. Pkt. 20¢; ½ oz. 60¢; oz. \$1.00; 4 ozs. \$3.00; ½ lb. \$5.50; 1 lb. \$10.00.

266 White Plume

(E) The earliest and most easily blanching of all Celery varieties, at its best right after digging but does not keep well. The foliage is an attractive light green tinted with white. When blanching the stalks are pure snowy white. They are tender and crisp, without any fiber or strings. Their flavor is rich and nutty. Highly recommended to home gardeners, and of decided value to market growers who are interested to benefit from the early high market prices. Pkt. 10¢; ½ oz. 20¢; oz. 35¢; 4 ozs. \$1.00; ½ lb. \$1.65; 1 lb. \$3.00.

268 Golden Plume

(E) This is also called Wonderful, a name that is most appropriate for this splendid early variety. Some gardeners consider it the best early Celery in existence. It is quite resistant to blight and rot and possesses very good storing qualities. The plants are of medium size, stocky, compact, and have a thick, full, creamy heart. The stalks blanch readily and are of excellent table quality. It resembles Golden Self-Blanching but is earlier, larger, and of more vigorous growth. A fine variety for the home and market garden. Pkt. 20¢; ½ oz. 35¢; oz. 60¢; 4 ozs. \$1.80; ½ lb. \$3.30; 1 lb. \$6.00.

*The Largest, Most Solid, and Finest
Nut-Flavored Celery in Existence*

(L) Burpee's Fordhook Celery is, without question, the finest fall and winter variety in existence. The plants are stocky and compact, averaging 15 to 18 in. tall. Although comparatively dwarf, they are so solid that they weigh fully 2 lbs. each. Their limited height is of great importance since the plants are by far more easily blanched than those of the taller varieties. The stalks, after blanching, are a beautiful pure silvery white with a small tender heart in the center. They are extremely thick, measuring over $\frac{1}{2}$ in. in diameter. Always they are tender, crisp, and juicy. Fordhook Celery will keep in perfect condition throughout the winter. Pkt. 25¢; $\frac{1}{2}$ oz. 60¢; oz. \$1.00; 4 ozs. \$3.00; $\frac{1}{2}$ lb. \$5.50; lb. \$10.00.

Blanching*

267 **Easy Blanching**⊙

(M) This is a midseason or second-early Celery which will be ready for use soon after Golden Self-Blanching. It resembles Golden Self-Blanching in size and general characteristic of growth, but the foliage is a beautiful bright rich green. The plants make a vigorous, upright yet compact growth and the stalks are easily blanched to a beautiful pure white color. They are thick, solid, heavy, unusually meaty, pure white, crisp, altogether free from any fiber or strings, and of extra fine flavor. Easy Blanching has desirable blight-resistant qualities and has proved to be hardier than Golden Self-Blanching. While it is a mid-season Celery, it also stores well throughout the winter. It has become a great favorite with both home gardeners and market growers who appreciate a quality Celery for fall and winter. Pkt. 10¢; $\frac{1}{2}$ oz. 25¢; oz. 45¢; 4 ozs. \$1.40; $\frac{1}{2}$ lb. \$2.60; lb. \$4.75.

275 **Winter Queen**

(L) One of the finest dwarf winter Celeries we have ever grown. It resembles Golden Self-Blanching in height and habit, but the leaves are a rich green color and in this respect are not unlike those of Giant Pascal. It is more easily blanched than the latter because of its compact growth. As it blanches quickly it is ready for use or market much earlier in the fall. The plants make large bunches of extra-heavy stalks with very large, tightly folded hearts. The plants and stalks are all of even length and present a most handsome appearance when bunched or crated. Winter Queen should be blanched with soil in order to bring out the crisp, nutty, and refreshing flavor. Ready for the table after blanching and will keep in splendid condition throughout the winter. Pkt. 5¢; $\frac{1}{2}$ oz. 20¢; oz. 30¢; 4 ozs. 90¢; $\frac{1}{2}$ lb. \$1.40; lb. \$2.50.

Giant Pascal

282 **Giant Pascal**⊙

(L) Immense, light yellow stalks which will keep in perfect condition throughout the winter. Considered by many the standard winter Celery. The plants are productive, with tall upright leaves of a rich dark green color. The stalks are tall and thick. They are broad, distinctly ribbed, tender, crisp, and very tasty. After blanching they are an attractive light yellow. Inasmuch as the stalks are green, soil should be used for blanching. It will keep in perfect condition throughout the winter months. Pkt. 10¢; $\frac{1}{2}$ oz. 20¢; oz. 30¢; 4 ozs. 90¢; $\frac{1}{2}$ lb. \$1.40; lb. \$2.50.

Celeriac *or Turnip-Rooted Celery*

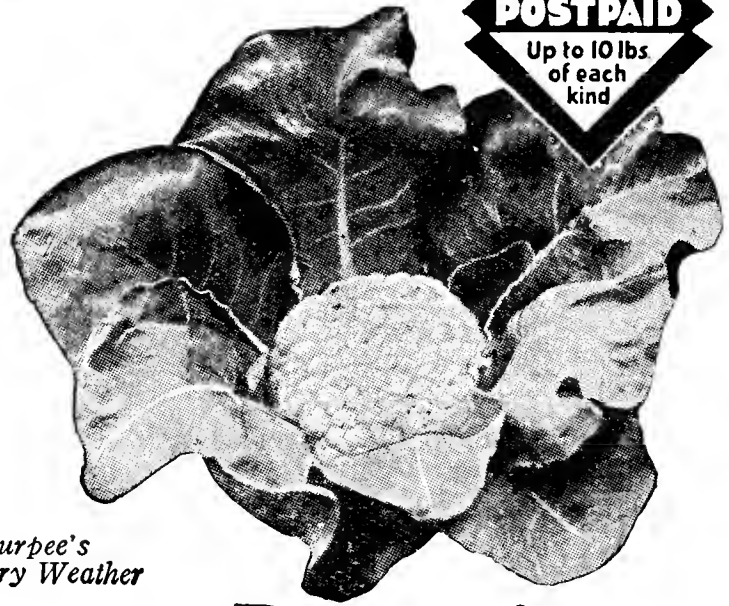

293 **Giant Prague**

Gradually more and more gardeners are becoming acquainted with this splendid vegetable, which is much easier to grow than blanching Celery. The edible portion is the large thick root, which is highly valued boiled, or is used in vegetable soup, stews, and other dishes. It occupies a foremost place for these purposes in the kitchens of continental Europe. Celeriac grows best in soil which is moderately moist yet well drained. During cool seasons the roots grow to perfection. They do well in any good garden soil, particularly that which is quite rich.

Start the seed in boxes indoors and when the seedlings are large enough to be handled, transplant into the garden to stand about 8 to 10 in. apart each way. Use when the roots are of moderately large size. Does not require blanching. Pkt. 10¢; oz. 30¢; 4 ozs. 90¢; $\frac{1}{2}$ lb. \$1.40; lb. \$2.50.

Burpee's CAULIFLOWER

Cauliflower is one of our choicest vegetables. For an early crop, start the seed indoors during March and set into the open by the end of April. For a main or fall crop, sow the seed during June and plant out the latter part of July. It takes about 30 to 40 days for the plants to grow large enough for setting into the field. One oz. will give 1000 to 1500 strong plants; $\frac{1}{4}$ lb. is required for one acre, placing the rows 3 ft. apart and the plants 2 ft. apart in the rows. Early (E) varieties require from 52 to 65 days to mature. Late (L) varieties require 90 days.

*Burpee's
Dry Weather*

244 Burpee's Best Early

(E) A splendid extra-early Cauliflower, unexcelled for certainty of heading. Always can be depended upon to give a heavy crop. Of strong growth with erect, pointed, dark green leaves growing closely about the heads. Grown in good soil, the snow-white heads measure 8 to 10 in. across. It is an excellent market and home garden variety and should be sown so that the heads will mature during either early summer or late fall. Of extra-fine quality. Pkt. 15¢; $\frac{1}{4}$ oz. 75¢; $\frac{1}{2}$ oz. \$1.35; oz. \$2.40; 4 ozs. \$7.20; $\frac{1}{2}$ lb. \$13.20; lb. \$24.00.

249 Extra-Early Dwarf Erfurt (E)

We offer an extra-select strain of this choice variety of the popular Erfurt type, which is known for its reliability in heading. Of dwarf compact growth with large heads of uniform size, having a closely formed, very smooth, pure white curd of finest flavor. Pkt. 15¢; $\frac{1}{4}$ oz. 75¢; $\frac{1}{2}$ oz. \$1.35; oz. \$2.40; 4 ozs. \$7.20; $\frac{1}{2}$ lb. \$13.20; lb. \$24.00.

258 Veitch's Autumn Giant (L)

We consider this the finest of the late Cauliflowers, producing compact white heads surrounded by a mass of large spreading leaves. Like all late varieties, it is not nearly so reliable in heading as the earlier types. Pkt. 10¢; $\frac{1}{4}$ oz. 25¢; $\frac{1}{2}$ oz. 35¢; oz. 50¢; 4 ozs. \$1.50; $\frac{1}{2}$ lb. \$2.75; lb. \$5.00.

245 Burpee's Dry Weather ☉

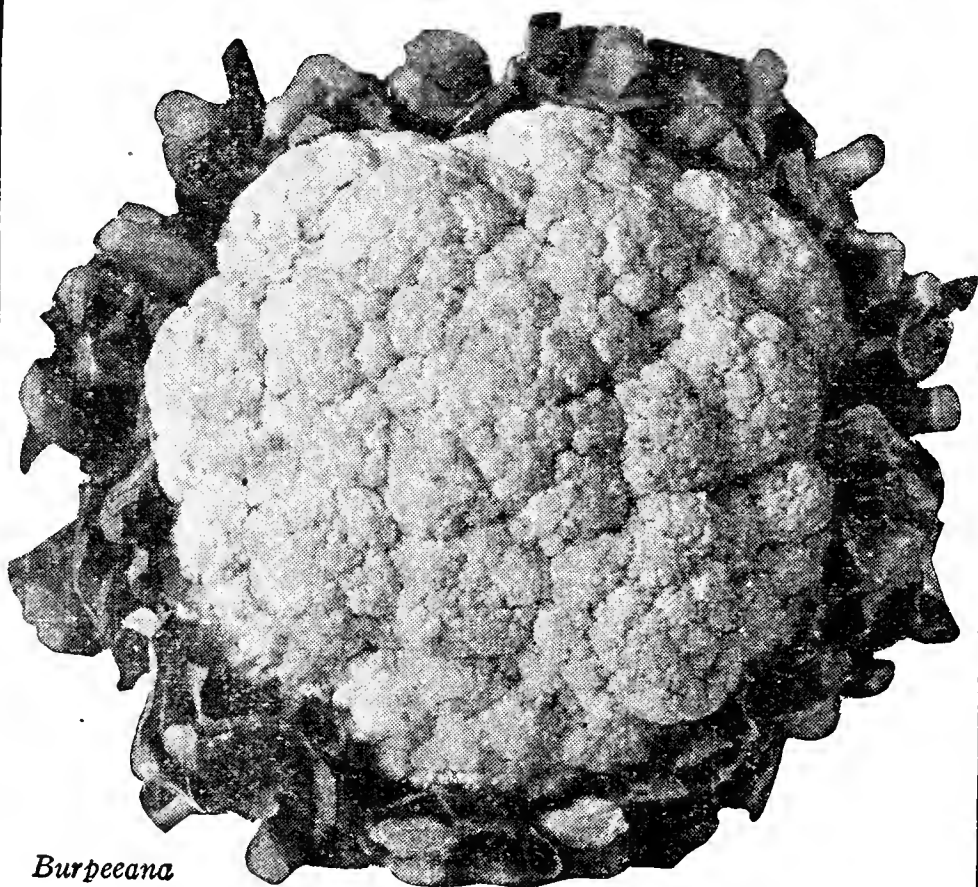

(E) Though Cauliflower does best in a cool and moist season, in "Dry Weather" we have a variety which is actually drought resistant and will produce heads when all other varieties are a complete failure due to lack of moisture. In addition to this most valuable feature, it is a Cauliflower of the highest quality, producing large, pure white heads only a week later than Burpee's Best Early. The heads are considerably larger than those of that famous variety, and are surrounded by more foliage, making them less suitable for forcing. Its drought resistance makes it a most important variety for all dry sections. The white curd is closely formed, of fine texture, smooth, and solid. Individual heads weigh 2 lbs. each. Pkt. 15¢; $\frac{1}{4}$ oz. 85¢; $\frac{1}{2}$ oz. \$1.45; oz. \$2.50; 4 ozs. \$7.50; $\frac{1}{2}$ lb. \$13.75; lb. \$25.00.

246 Burpee's Fordhook ☉

(E) The earliest of all varieties we have ever grown. The fact that we named this Fordhook is ample proof of our high esteem for this variety. It will head up well even under unfavorable conditions when most other varieties fail to give a satisfactory crop of good-sized, marketable heads. The plants are dwarf and compact, yet the heads measure fully 6 in. in diameter. They are well rounded and have a fine closely formed curd of a pure white color. After another season of watching this variety in our trial grounds and comparing it with other varieties we are even more enthusiastic about its qualities, and we wish that every grower of Cauliflower could give it a trial this year. Pkt. 15¢; $\frac{1}{4}$ oz. 85¢; $\frac{1}{2}$ oz. \$1.50; oz. \$2.60; 4 ozs. \$7.80; $\frac{1}{2}$ lb. \$14.30; lb. \$26.00.

247 Early Snowball

(E) Many market growers claim for Early Snowball first place for both early and late planting. It is also splendid for forcing in the greenhouse and frames. Brings a good price in the early market and stands shipping very well. The plants are dwarf. They have a well-rounded head about 6 in. in diameter and a smooth compact curd. The heads weigh from $1\frac{1}{2}$ to 2 lbs. each and are, therefore, of a size that will sell well in all markets. Pkt. 10¢; $\frac{1}{4}$ oz. 85¢; $\frac{1}{2}$ oz. \$1.45; oz. \$2.50; 4 ozs. \$7.50; $\frac{1}{2}$ lb. \$13.75; lb. \$25.00.

Burpeeana

253 Burpeeana ☉

(E) This is Super Snowball as offered by Burpee. It stands out as the most valuable Cauliflower. In the tests of the Pennsylvania State College it appeared as the best of all strains, maturing not quite so early as Burpee's Fordhook. On our own trial farms it proved itself head and shoulders above all other varieties. It is an early variety, with the heads forming all at one time, showing a uniformity of size, shape, and type that is truly astonishing. Beautiful, round, pure white heads with smooth curds. Of highest quality. Pkt. 30¢; $\frac{1}{4}$ oz. \$1.20; $\frac{1}{2}$ oz. \$2.00; oz. \$3.50; 4 ozs. \$10.50; $\frac{1}{2}$ lb. \$19.25; lb. \$35.00.

☉ Follow the Bull's Eye ☉

One oz. of seed is needed for 500 ft. of drill.

Green Curled Endive

430 Green Curled or Giant Fringed Oyster ☉

The leaves are finely cut or lacinated, giving the plants a feathery appearance. They are a rich green color but blanch to an attractive creamy white. It is the most widely grown variety of Endive, producing large circular plants, often measuring 15 in. or more in diameter. 297 French Endive or Witloof Chicory

This splendid vegetable gives every gardener a chance to grow his own winter salad without the use of a greenhouse, since the roots can easily be forced in the cellar during the winter. To grow the roots, sow the seed in the open not later than June 1 and lift them in the fall. For forcing, dig them and pack closely together in boxes and cover with 6 in. of sand, light earth, peatmoss, or sawdust. Water them and place near the heater to keep warm. When the sprouts break through the surface they are ready for the table. They are delicious served with French dressing. Pkt. 10¢; oz. 25¢; 4 ozs. 75¢; ½ lb. \$1.15; lb. \$2.00.

Burpee's Carrots

Sow the seed thinly in shallow drills early in the spring, in rows not less than 12 in. apart. Make succession sowings every two weeks up to the early part of July. When well started, thin the small early varieties to stand 2 in. apart in the row and the larger later varieties from 3 to 4 in. A rich, mellow, deeply worked soil gives the finest Carrots. Cultivate throughout the season to insure smooth straight roots. For winter storing, sow a long row about the middle of June which will make full size roots before cold weather sets in. One ounce of Carrot seed will sow 250 ft. of drill; 3 lbs. of seed is required to drill one acre. The early varieties mature in 60 to 65 days after sowing. The midseason Carrots require 65 to 75 days and the late varieties 75 to 85 days to come to maturity.

Cucumbers

Make your first sowing of Cucumbers after all danger of frost has passed to supply fruits for summer use, and a second sowing in late June or early July to furnish Cucumbers for fall use. Pickling Cucumbers usually are sown during midsummer. One oz. of seed plants 100 hills, and 1 lb. of seed is needed to plant one acre. Most varieties mature in about 50 to 60 days after sowing; London or Improved Long Green needs 70 days and White India Gherkin 80 days.

Burpee's Crisp-Head LETTUCE

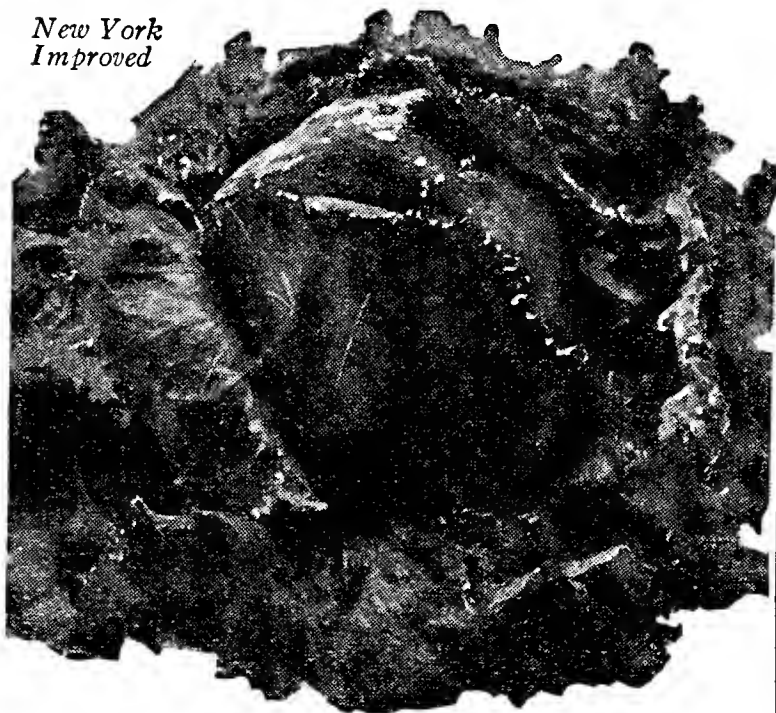

These are distinct from the Butterhead varieties. They head more surely during warm weather, and have a well-blanced, pure white heart. They are especially crisp and mild in flavor even during the hot summer months. This class of Lettuce contains a number of foremost varieties grown extensively on a large scale to supply the best city markets with quality Lettuce.

522 Hanson This is the earliest maturing of the Crisp-Head Lettuce. Grows into a quite broad, slightly flattened head of a beautiful light green color. It is excellent for midsummer planting and can be depended upon to head well. Of the highest quality—crisp, mild, tender, juicy, and well blanced. Pkt. 10¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 80¢; lb. \$1.35; 2 lbs. \$2.50; 5 lbs. \$5.95.

523 New York No. 12 Through single plant selection from the original New York Improved, this still further improved strain has been bred for earliness, larger size, increased solidity, and dependability of heading. Under favorable conditions it will mature in 65 days after planting and will give a fine crop of attractive, large, perfect heads. The tightly folded heart is well blanced to a beautiful silvery white. Crisp, juicy, and sweet. Pkt. 15¢; oz. 30¢; 4 ozs. 85¢; ½ lb. \$1.25; lb. \$2.25; 2 lbs. \$4.20; 5 lbs. \$10.10.

New York Improved

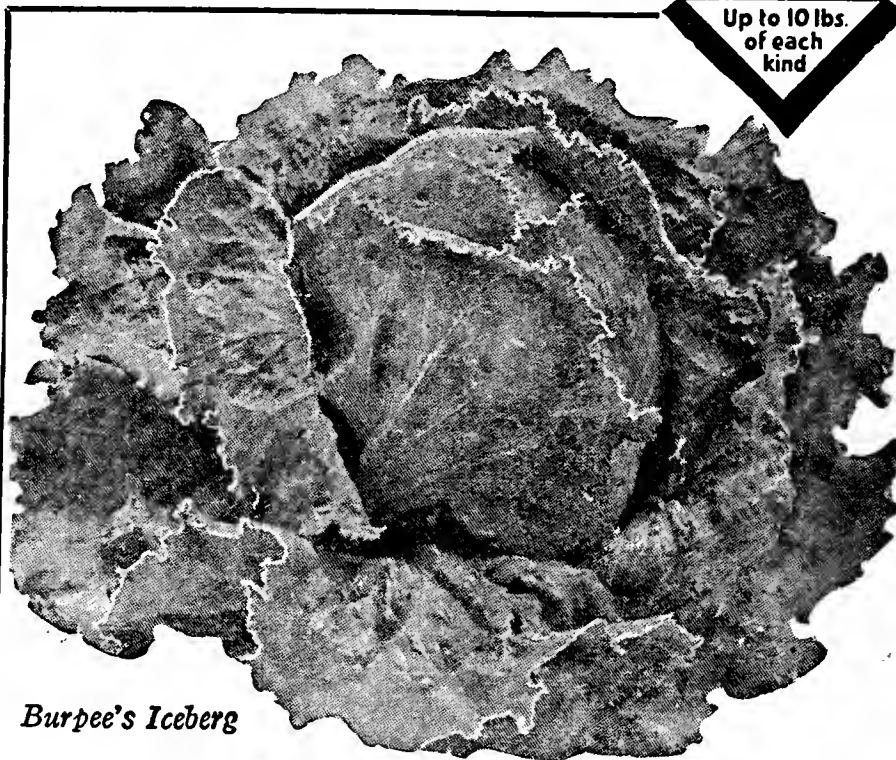

524 New York Improved ☉

Sweet, tasty, and juicy. It is no wonder that such a remarkable Lettuce as New York Improved has become known in some sections also under some fancy names, such as Los Angeles and Wonderful. In the Imperial Valley of California it is grown under the name of Iceberg, though this name belongs rightly and by priority to the variety described as Burpee's Iceberg. The heads grow to immense size and are closely folded. The outer leaves are deep green and the heart is blanced to a beautiful pure white. It is crisp, juicy, and of most appetizing flavor. Pkt. 10¢; oz. 25¢; 4 ozs. 75¢; ½ lb. \$1.15; lb. \$2.00; 2 lbs. \$3.70; 5 lbs. \$9.00.

528 Burpee's Brittle-Ice

A fine, quick-growing Lettuce with bright green outer leaves and a nearly white heart that is tender, succulent, and crisp. It retains its crispness and mild flavor to a greater degree during warm weather than any other crisp-head variety except Iceberg. Its luscious refreshing flavor has made it a popular Lettuce with many gardeners. The heads are fairly compact and of conical shape. Each leaf has a thick, white, tender midrib of a crispness and refreshing flavor that suggest the brittleness of thin ice. Pkt. 10¢; oz. 25¢; 4 ozs. 70¢; ½ lb. \$1.10; lb. \$1.85; 2 lbs. \$3.40; 5 lbs. \$8.15.

Burpee's Iceberg

530 Burpee's Iceberg ☉

Curled, crisp plants of medium size, producing medium green, wavy, fringed leaves having edges that are tinged with light brown. The heads are compact, medium-large, and have few outer leaves and most delicious crisp tender hearts blanced to a silvery white even under average garden conditions. Iceberg is exceedingly vigorous and hardy, so that it will withstand quite hot weather. This is the original Iceberg Lettuce introduced by Burpee in 1894. It should not be confused with New York Improved, which is grown in certain western sections under the name Iceberg. Pkt. 10¢; oz. 20¢; 4 ozs. 60¢; ½ lb. 85¢; lb. \$1.50; 2 lbs. \$2.75; 5 lbs. \$6.60.

Butterhead Lettuce

These grow to good size and form solid heads of rounded form, resembling a small Cabbage in appearance. The heart is tightly folded and blanches to a light golden or buttery yellow. They will grow well in moderately warm weather, but are not as resistant to heat as the Crisp-Head varieties. This class includes a number of well-known varieties. Excellent for succession sowings.

514 Burpee's Butterhead ☉

A Lettuce of immense size and great solidity, with light green outer leaves and a beautiful light yellow heart. It is a popular variety with many market growers and home gardeners. Plants grown on fertile soil often measure 12 in. in diameter. Can be grown successfully during moderately hot weather. Of foremost value because of its large size, splendid appearance, and extra fine quality and flavor. Pkt. 10¢; oz. 20¢; 4 ozs. 65¢; ½ lb. \$1.00; lb. \$1.75; 2 lbs. \$3.20; 5 lbs. \$7.70.

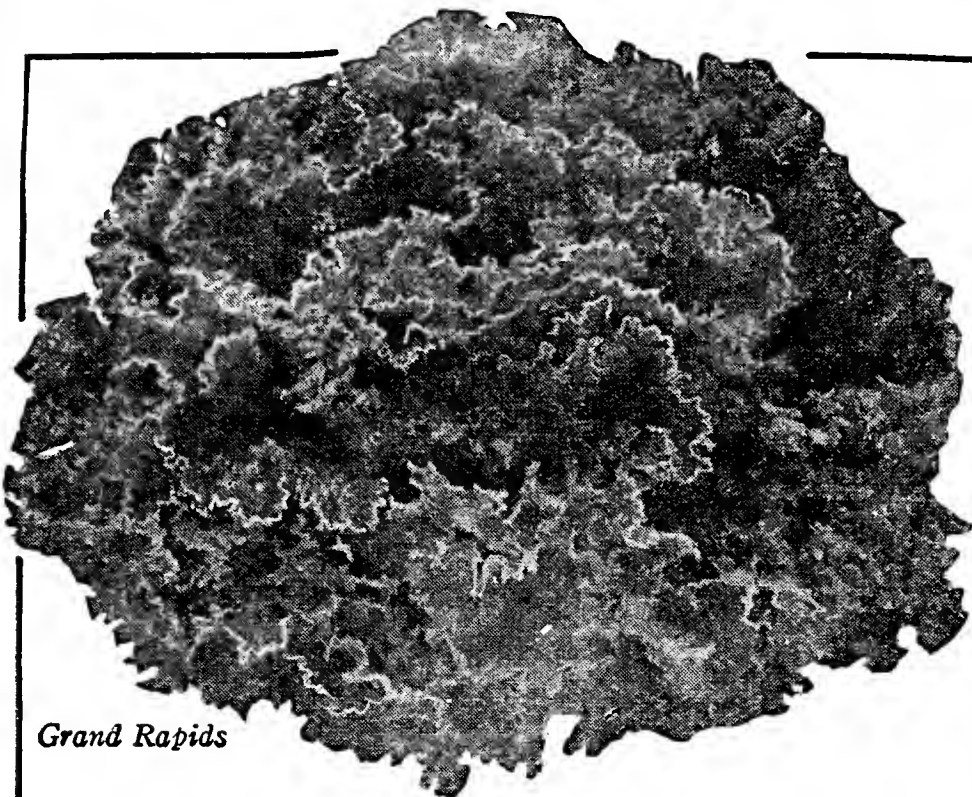

508 California Cream Butter

A first-quality variety for the home garden and for market, particularly adapted for early summer planting. It is grown extensively in the South for shipping to northern markets during the winter. The heads are of large size and very solid. The large outer leaves are thick and of a dark glossy green color, lightly tinged with brown. The heart is blanced to a beautiful golden yellow. It is a good shipper and always sells well in the market because of its remarkably fine flavor and the solidity of the heads. Pkt. 5¢; oz. 15¢; 4 ozs. 45¢; ½ lb. 70¢; lb. \$1.15; 2 lbs. \$2.10; 5 lbs. \$5.05.

481 Creamy Heart ☉ A selection from California Cream Butter without the brown spots and edges of that variety. Solid, well-blanced heads of superb quality. Excellent for late spring sowing. Quite heat-resistant. Pkt. 15¢; oz. 20¢; 4 ozs. 65¢; ½ lb. \$1.00; lb. \$1.75; 2 lbs. \$3.20; 5 lbs. \$7.70.

The extra-early and forcing varieties of head Lettuce are listed on the preceding page

Loosehead or Cutting **LETTUCE**

Grand Rapids

485 **Grand Rapids** Ⓞ

Strictly non-heading, with much fringed and curled leaves produced in such abundance that the center part of the plant is well blanched and exceptionally tender. Used extensively for forcing in the greenhouse during winter but is not less valuable for growing outdoors during the spring, summer, and fall. Thick sowing will give an abundance of young tender leaves very early in the season, but if the plants are spaced 12 to 18 in. apart each way they will produce immense large round masses of tender juicy delicious leaves. Pkt. 10¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 80¢; lb. \$1.35; 2 lbs. \$2.50; 5 lbs. \$5.95.

These do not form solidly folded heads but where the plants are grown singly at a suitable distance apart they make a large, round, thick bunch of leaves which are blanched to a light green or creamy yellow in the center of the plant. The leaves are heavily curled or crumpled, attractive in appearance, and of delightful crispness and mild flavor. They are splendid to provide an extra-early supply of delicious salad since the thinnings may be used for the table when just a few inches tall. They are fine also for growing in the greenhouse during winter.

490 **Early Curled Simpson**

This fine loose-heading variety is also known as Silesia or White-Seeded Simpson. The large plants have very light green, frilled and crumpled leaves with a beautifully fringed edge. Forms a compact bunch of crisp brittle leaves of excellent flavor. Grows quickly and is very hardy. Tender, succulent, and of decidedly piquant taste. Fine for spring and early summer use. A very old standard variety. Pkt. 10¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 75¢; lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50.

497 **Early Prize Head**

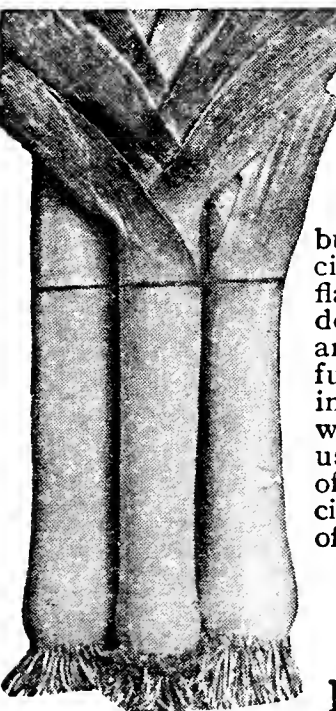

Medium-large plants composed of many curly leaves of a bright green color shaded with light brown. One of the best home garden varieties. Of quick growth and excellent flavor. It is strictly a non-heading Lettuce but yields a great quantity of crisp leaves. Pkt. 5¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 75¢; lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50.

482 **Chicken Lettuce**

This is a non-heading Lettuce, quite different from those used for human food. The plants grow 4 ft. tall before they run to seed. It is ready for cutting in 45 days after sowing. Planted extensively for feeding poultry and rabbits. Yields more food for this purpose than any other plant you can grow. After cutting, the stumps will start again to make a new growth and within a short time you will be able to harvest another crop of tender nutritious leaves for feeding. Pkt. 10¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 75¢; lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50.

493 Black-Seeded Simpson A splendid non-heading or cutting variety forming large plants of a bright yellowish green color. Grows quickly, is early, and of extra fine quality. The texture of the leaves is brittle and crisp. The flavor is delicate and appetizing. Though an old variety, it is still grown extensively in many sections. Pkt. 10¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 75¢; lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50.

LEEKS

The long thick blanched neck of Leeks is excellent for soups, stews, or creamed. It belongs to the Onion family but has a decidedly sweet flavor. Sow indoors in March and set out in furrows 4 to 5 in. deep. Blanch with earth before using. One oz. of seed is sufficient for 200 ft. of drill.

461 **Broad London**

A strong-growing variety with large thick stems of sweet flavor. It grows best in a rich fertile soil. This splendid variety is also known as Large American Flag. It is so superior in every way to all the older varieties that it has completely replaced them. Pkt. 10¢; oz. 20¢; 4 ozs. 60¢; ½ lb. 85¢; lb. \$1.50.

Cos or Romaine Lettuce

Dwarf White Heart

Cos Lettuce or Salad Romaine is much esteemed for its fresh crispness and mild flavor. It is grown widely in the northern states during spring and early summer and to provide a crop of tightly folded, elongated heads for fall use. Dwarf White Heart is the earlier of the two varieties we list and, since it is self-closing, does not require tying up. Paris White Cos forms loose heads which must be tied together with strings in order to blanch them properly and make them tender.

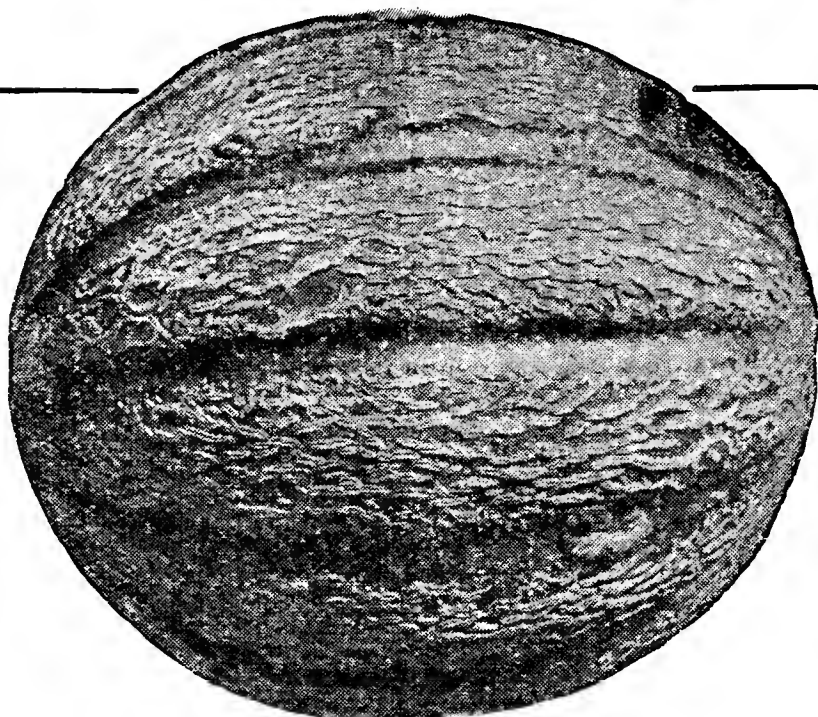

537 **Dwarf White Heart** Ⓞ

We believe this is the most satisfactory of the Cos Lettuce varieties. It is crisp, has a refreshing snappy flavor, and does not need tying up in order to blanch the heart. Compact, strictly erect plants 10 in. tall, containing a surprising quantity of brittle juicy leaves of a most appetizing piquant flavor. It is highly recommended for the home garden and high-class markets. Pkt. 10¢; oz. 20¢; 4 ozs. 60¢; ½ lb. 85¢; lb. \$1.50; 2 lbs. \$2.75; 5 lbs. \$6.60.

539 **Paris White Cos**

Also known as Trianon or Paris Self-Folding. For best results this variety should be tied with string or raffia to blanch the heart. Pkt. 5¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 75¢; lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50.

Muskmelons—Cantaloupes

544 Burpee's Netted Gem®

*The Most Popular
of all green-fleshed Melons*

(E) The variety grown at Rocky Ford, Colorado, under the name of Rocky Ford is the Netted Gem, which Burpee had the distinction of originating and introducing in 1881. A pure Rocky Ford Cantaloupe, when ripe, has a silver-colored netting which is lace-like in appearance. The skin is green, turning to a peculiar gray color when the melons are fit for shipping. The flesh is green and so sweet and luscious that it may be eaten close to the rind. Due to the small seed cavity, the fruits weigh about 1½ lbs. each. They are very firm and solid. Pkt. 10¢; oz. 15¢; 4 ozs. 40¢; ½ lb. 60¢; lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00.

557 Honey Ball (L) This is a Texas melon which will ripen considerably farther north. It requires a growing season of about 100 days and produces perfectly round fruits 6½ in. in diameter. They are covered with netting. The flesh is light green, very sweet, combining the flavor of the Cantaloupe with that of the Honey Dew. Pkt. 10¢; oz. 20¢; 4 ozs. 50¢; ½ lb. 80¢; lb. \$1.35; 2 lbs. \$2.50; 10 lbs. \$10.80.

The most suitable soil for melons is a rich warm sandy loam. Sow the seed after the soil has warmed up and the weather is quite settled—about the middle of May in the vicinity of Philadelphia. Place 6 to 8 seeds in a circle in slightly raised hills spaced 4 to 6 ft. apart, and cover the seed with one inch of fine soil. The early (E) varieties mature in 60 to 70 days. The midseason (M) or main crop varieties require 75 to 90 days, and the late (L) varieties require 95 to 115 days. One oz. of seed will plant 40 to 50 hills; 2 to 5 lbs. are required to plant one acre.

Burpee's Watermelons

Rich, rather sandy soils produce the finest crops of Watermelons, but a well-drained loam, especially with a southern exposure, is also suitable. Two shovelfuls of well-decomposed manure should be mixed with the soil under each hill. Watermelons should not be planted until the weather is quite warm. The plants grow vigorously and for this reason the hills should be about 6 to 8 feet apart. Place 6 to 8 seeds edgewise, with the eyes downward, in a circle in each hill, and cover $\frac{1}{2}$ inch deep with fine soil. One ounce will plant 20 to 25 hills; 4 to 5 pounds per acre. The early (E) Watermelons mature in 85 to 100 days. The midseason (M) varieties require from 100 to 120 days. Late (L) varieties need 120 days or more.

608 Burpee's Kleckley Sweets

(M) The most popular of all Watermelons for the home garden and for market. Also known under the name of Monte Cristo. Of a beautiful long and symmetrical shape, reaching 22 in. in length and 12 in. in diameter. The fruits weigh as much as 40 lbs. each. They have a glossy dark green skin and an unusually thin rind with the flesh ripening close to it. The flesh is a beautiful bright scarlet. The heart is remarkably broad and of most luscious sweet and rich flavor. It is free from fiber, tender and melting in the mouth. Pkt. 10¢; oz. 15¢; 4 ozs. 30¢; $\frac{1}{2}$ lb. 50¢; lb. 85¢; 2 lbs. \$1.55; 5 lbs. \$3.60; 10 lbs. \$6.35.

The rind is thin and for that reason the melons are not suited for shipping to distant markets, but for sale in local markets or for home use it is ideal on account of its luscious, sweet, rich pink flesh. Pkt. 10¢; oz. 15¢; 4 ozs. 30¢; $\frac{1}{2}$ lb. 45¢; lb. 75¢; 2 lbs. \$1.35; 5 lbs. \$3.20; 10 lbs. \$5.60.

Burpee's ONIONS

Onions are highly praised for their tonic qualities and their use is advocated by physicians everywhere. The soil best suited to grow a good crop of Onions is one that is reasonably fertile, well drained, and well prepared. Cover the seed lightly and when the seedlings are 3 to 4 in. tall, thin them to stand sufficiently far apart to develop without touching one another. When the bulbs have reached maturity, bend down the tops to hasten ripening before the Onions are harvested. One oz. of seed will give 200 ft. of drill; 4 to 5 lbs. are required for one acre. Onions require from 100 to 120 days to come to maturity.

Burpee's PEAS

Peas are both nutritious and delicious. They are sweetest and most delectable if served soon after they have been picked from the vines. For that reason every home garden should include enough Peas to supply the table for many weeks. The varieties which we list are all good but we particularly recommend the newer ones because they are not only superior in sweetness but more productive. For a continuous supply, sow the hardier round-seeded peas as early in the spring as the ground can be prepared. Follow them with the wrinkled-seeded sorts when all danger of frost has passed. Besides sowing varieties which will mature one after another, also make succession sowings at intervals of 10 to 14 days as long as the weather stays cool. One lb. of seed will sow 120 ft. of single row. In drills, 100 to 150 lbs. are required to plant one acre. The extra-early (EE) peas mature in 50 to 55 days; the early (E) varieties require 55 to 60 days; the second-early or main-crop (M) varieties need 65 to 75 days until their main picking.

Sow the seed thinly in shallow drills and cover with about one-quarter inch of fine soil. The popular name Oyster Plant has been given to Salsify because the roots have an Oyster-like flavor. Sow the seed in shallow drills early in the spring in rows 1 ft. apart, and thin the plants to stand 4 to 5 in. apart. The soil should be deep, rich, and mellow. They are hardy and may be left in the ground over winter for spring use. One oz. of seed will sow 75 ft. of row. 8 to 10 lbs. per acre.

983 Sandwich Island Mammoth

The roots, notwithstanding their extra-large size, are of excellent quality and have a most delightful delicate flavor. Sandwich Island Mammoth is a great improvement over the ordinary type, producing shorter and thicker roots of an even, straight growth with almost white flesh of a fine mild flavor. They are easily stored for winter use, covered with moist soil and kept in a cool cellar, or they may be left outdoors throughout the winter for spring use. TOMATOES

What is more attractive either as a salad or for garnishing than luscious juicy Tomatoes? They may be cooked in innumerable ways—by themselves or combined with other vegetables or meats. Tomatoes are exceedingly wholesome, rich in vitamins, and valuable as an appetizing dish in a great variety of forms. Start the seed indoors during February or March, and set out after all danger of frost has passed. Tomatoes do best in a rich, well-manured soil. For a continuous supply include early, midseason, and late varieties in your planting. The early varieties mature in 100 to 125 days, the midseason or second early varieties in 125 to 140 days, the late or main-crop varieties in 140 days.

Early Varieties

1086 Penn State Earliana

This has been selected for extra-early maturity, large size, even shape, and smoothness of skin by the Pennsylvania State College of Agriculture. The skin is a beautiful rich scarlet color. The flesh is mild and deliciously sub-acid. It is second only to Sunnybrook Earliana and, like all varieties belonging to this type, does best on warm sandy soil. Our seed has been produced from original stock. Pkt. 15¢; ½ oz. 25¢; oz. 45¢; 4 ozs. \$1.35; ½ lb. \$2.45; 1 lb. \$4.50; 2 lbs. \$8.35; 5 lbs. \$20.25.

1100 Spark's Earliana

This is the original Earliana Tomato which has proved so immensely valuable for growing on warm sandy soils. It has long been a great favorite with growers who have such conditions, and though excelled by Burpee's Sunnybrook Earliana and Penn State Earliana, there are still many growers who choose the original Spark's Earliana on account of earliness, productiveness, good shape, and rich color. Pkt. 10¢; ½ oz. 20¢; oz. 35¢; 4 ozs. \$1.00; ½ lb. \$1.65; 1 lb. \$3.00; 2 lbs. \$5.60; 5 lbs. \$13.50.

1107 June Pink An attractive large Tomato, maturing early and having bright deep pink skin and rich pinkish red flesh. It is the best early pink Tomato in existence. The meat is solid, of fine texture, and has a delightful sub-acid flavor. The shape of the fruits is somewhat flattened and also shows slight ridges. The vines set fruits abundantly. It is quite a favorite with many home gardeners. Pkt. 10¢; ½ oz. 25¢; oz. 40¢; 4 ozs. \$1.20; ½ lb. \$2.20; 1 lb. \$4.00; 2 lbs. \$7.45; 5 lbs. \$18.00.

1106 Pritchard® Scarlet Topper

New! An extra-early, large, smooth, and extremely solid Tomato of an intense scarlet color. Most productive and very attractive. Of a solidity that is truly remarkable, with very small seed pockets and no core. Its productiveness, particularly on rich soil, is amazing, and individual plants will bear 70 to 80 fruits each. It will yield 15 tons and more per acre. Pkt. 15¢; ½ oz. 30¢; oz. 55¢; 4 ozs. \$1.65; ½ lb. \$3.00; 1 lb. \$5.50; 2 lbs. \$10.25; 5 lbs. \$24.75.

1125 Break O'Day A Tomato outstanding for its early maturity and productiveness. The fruits are almost round and have a bright orange-scarlet skin. The vine growth is moderate. The fruits are solid and heavy, with small seed-cavities. It was originated by the Department of Agriculture from a cross made between Marglobe and Marvana and promises to be a leading early variety. Pkt. 15¢; ½ oz. 25¢; oz. 40¢; 4 ozs. \$1.20; ½ lb. \$2.20; 1 lb. \$4.00; 2 lbs. \$7.45; 5 lbs. \$18.00.

Burpee's
Sunnybrook
Earliana

1097 Burpee's Sunnybrook Earliana®

An extra-early red Tomato with fine, smooth, scarlet-red skin. Our special Sunnybrook strain matures about five days earlier than other Earliana strains. The compact vines carry an enormous crop of beautiful scarlet-red fruits. The entire crop can be gathered usually in about three weeks from the time the first fruit ripens. It is a most productive variety, splendid for market and for the home garden. The fruits are very solid. They are produced mostly in the center of the plant. Fleshy, juicy, and of excellent flavor. Pkt. 10¢; ½ oz. 25¢; oz. 40¢; 4 ozs. \$1.20; ½ lb. \$2.20; 1 lb. \$4.00; 2 lbs. \$7.45; 5 lbs. \$18.00.

Second-Early Tomatoes

Chalk's Early Jewel

1101 Chalk's Early Jewel

The largest, smoothest, and finest flavored, second-early, bright red Tomato for home-garden planting and for market. The fruits are nearly round and slightly flattened. They are very deep, solid, and meaty, with only a few quite small seed-cells. Without question, it is the best early garden Tomato. Through careful selections made year after year our strain has become extremely uniform in every way. The greatest attention has been paid to productiveness. The color of the skin is an attractive rich crimson-scarlet and the flesh is a luscious deep scarlet-red. Planted extensively for canning in northern sections which require quick-maturing varieties. Pkt. 10¢; ½ oz. 20¢; oz. 35¢; 4 ozs. \$1.00; ½ lb. \$1.65; lb. \$3.00; 2 lbs. \$5.60; 5 lbs. \$13.50.

1117 Burpee's Self-Pruning

Here is a Tomato which is distinct in every way. The name Self-Pruning refers to its limited branching habit, a feature that will appeal particularly to home gardeners who train their Tomatoes on stakes or over trellises. The limited branching habit makes it possible for the plant to throw all its strength into fruit production and consequently Burpee's Self-Pruning is an exceptionally heavy cropper. The Tomatoes are perfectly smooth and very solid. They are of handy size, with an even-colored, glossy, bright pinkish red skin. The flesh is juicy and of delightful sub-acid flavor. Pkt. 15¢; ½ oz. 30¢; oz. 50¢; 4 ozs. \$1.50; ½ lb. \$2.75; lb. \$5.00; 2 lbs. \$9.30; 5 lbs. \$22.50.

1120 Bonny Best

A selection from Chalk's Jewel made in Montgomery County, Pa. The fruits are of medium size, usually weighing from 4 to 6 ozs. each. They are borne in clusters, each containing 3 to 5 fruits. Their shape is globular, somewhat flattened, and the skin is very smooth. The color of the fruits is a bright scarlet-red from stem to blossom-end. Though somewhat smaller than Chalk's Jewel, the fruits will mature about a week earlier. An ideal variety for the home garden on account of its prolificness. Often forced in the greenhouse during the winter months. Pkt. 10¢; ½ oz. 20¢; oz. 35¢; 4 ozs. \$1.00; ½ lb. \$1.65; lb. \$3.00; 2 lbs. \$5.60; 5 lbs. \$13.50.

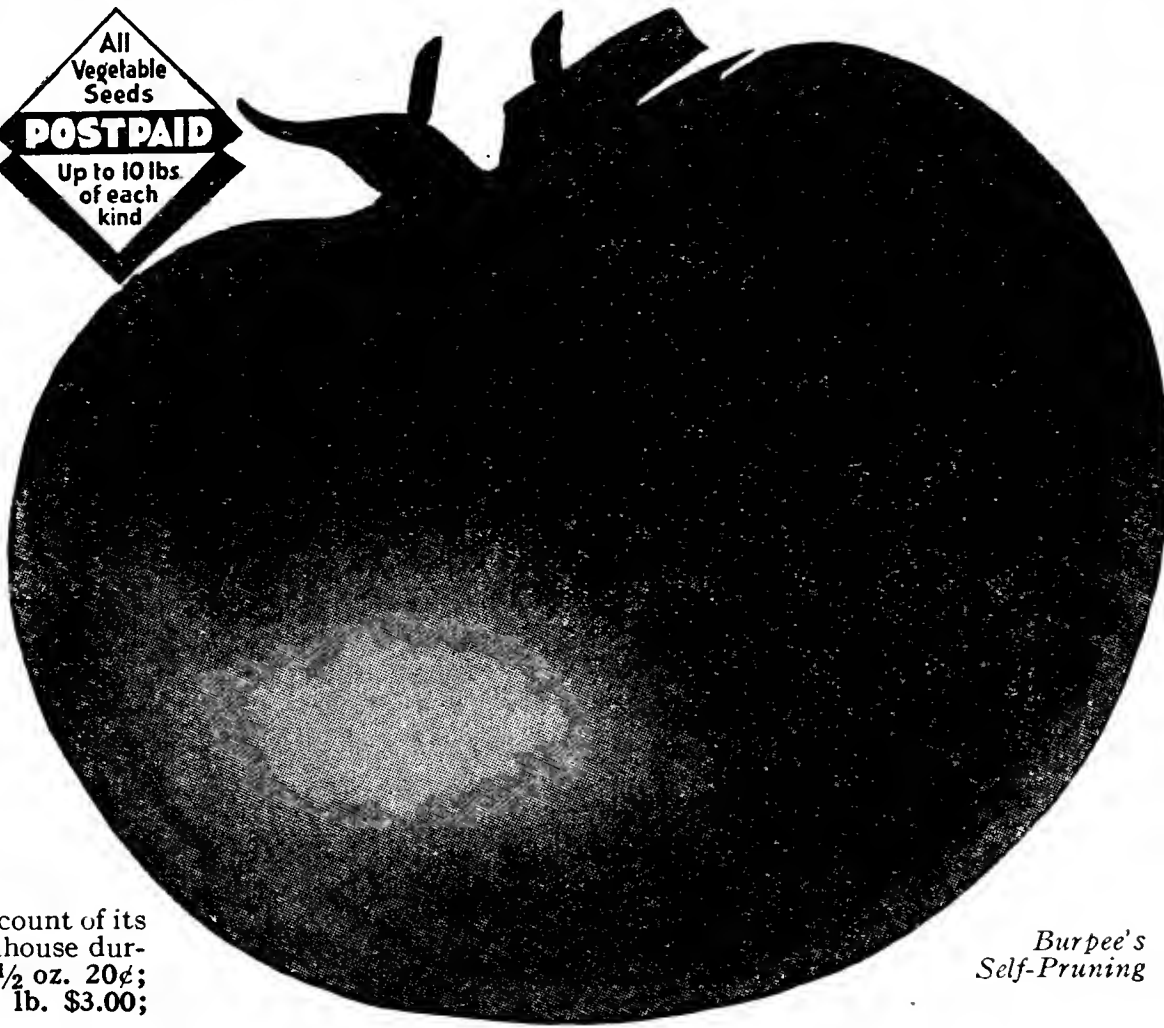

1087 John Baer This is an attractive second-early Tomato producing an excellent crop of rich scarlet-red fruits. It is a selection from Chalk's Jewel and consequently there is a great resemblance to it in size, form, and color. It has proved to be of particular value for canning in northern sections where an early, solid, heavy fruiting variety is needed. The fruits are thick through and slightly flattened at the top. They are smooth, firm, and of medium-large size. We have a particularly fine stock of this excellent Tomato which we can highly recommend to market growers and home gardeners located in sections where the second-early varieties take the place of the main-crop tomatoes on account of the short growing season. Pkt. 10¢; ½ oz. 20¢; oz. 35¢; 4 ozs. \$1.00; ½ lb. \$1.65; lb. \$3.00; 2 lbs. \$5.60; 5 lbs. \$13.50.

1112 Trucker's Favorite (Burpee's) This Burpee introduction is an excellent large choice variety of remarkable solidity, attractive appearance, and highest quality. The fruits measure 4 in. in diameter and are 2½ in. thick. They mature just before the main-crop varieties. The smooth skin is a beautiful deep purple-red of even coloring from stem to blossom-end. The fruits are solid and of finest quality. Pkt. 10¢; ½ oz. 25¢; oz. 45¢; 4 ozs. \$1.35; ½ lb. \$2.45; lb. \$4.50; 2 lbs. \$8.35; 5 lbs. \$20.25.

Late or Main Crop Tomatoes

Marglobe

1089 Marglobe

No other Tomato ever introduced has been acclaimed as quickly as this remarkable variety which was originated with the Department of Agriculture in Washington. It is an all-purpose Tomato in every way, embodying all the good qualities looked for by the home gardener, the market grower, and the canner. It is particularly valuable for shipping and has proven to be decidedly disease-resistant, particularly against Fusarium Wilt and Nail-head Rust. The plants are vigorous and very productive, bearing a wonderful crop of uniformly globe-shaped, deep scarlet, large fruits. Young fruits have a tendency to be of a somewhat oval shape. The skin is smooth and evenly colored from stem to blossom-end. The interior of the fruits is solid, meaty, and juicy. The flavor of the bright red flesh is delicious. Pkt. 10¢; ½ oz. 25¢; oz. 40¢; 4 ozs. \$1.15; ½ lb. \$1.90; lb. \$3.50; 2 lbs. \$6.50; 5 lbs. \$15.75.

1074 Stone This is one of the old favorite late or main-crop Tomatoes known for its productive-ness. The fruits are large, smooth, and have a deep scarlet skin. It is a standard variety with truckers and canners who know that they can depend upon it for a large crop of attractive and heavy fruits. Pkt. 5¢; ½ oz. 20¢; oz. 35¢; 4 ozs. 95¢; ½ lb. \$1.50; lb. \$2.75; 2 lbs. \$5.10; 5 lbs. \$12.35.

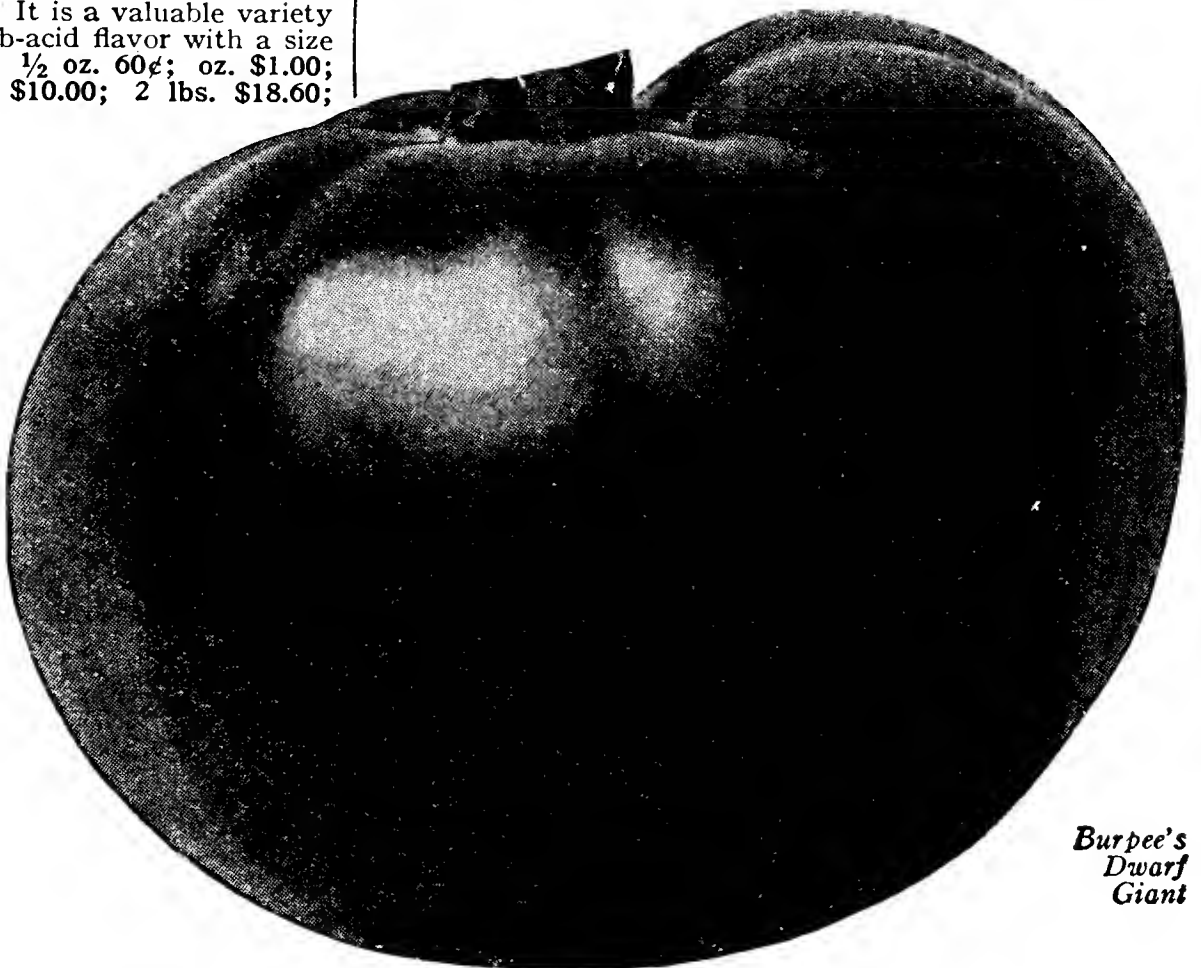

1091 Oxheart—New!

A newer variety which positively is the largest Tomato ever introduced. The skin is purplish scarlet. It is smooth and evenly colored. The individual tomatoes will weigh as much as a pound and a half each. The oxheart shape of the fruits is most distinct. They are extremely solid and have few seed-cells, which accounts for their enormous weight. If you want to beat your neighbors by growing the largest smooth Tomatoes, try Oxheart this year. It is a valuable variety which combines a rich luscious sub-acid flavor with a size that is most unusual. Pkt. 25¢; ½ oz. 60¢; oz. \$1.00; 4 ozs. \$3.00; ½ lb. \$5.50; lb. \$10.00; 2 lbs. \$18.60; 5 lbs. \$45.00.

1095 Burpee's Dwarf Giant

This is the finest and best of all dwarf Tomatoes, producing fruits which will weigh 10 to 20 ozs. each. The fruits are very attractive. They are smooth, somewhat flattened, and have a rich purple-crimson skin. Burpee's Dwarf Giant is the most meaty of all Tomatoes, with flesh free from any hard fiber or core. The meat is fine grained, juicy, and solid enough to stand shipping well. It has a most delicious and rich taste. The seed cavities are extremely small and it is, therefore, a shy seeder. Highly valued by home gardeners and market growers who find it a great advantage to grow a variety of compact habit which can be planted closely. Pkt. 15¢; ½ oz. 45¢; oz. 75¢; 4 ozs. \$2.25; ½ lb. \$4.10; lb. \$7.50; 2 lbs. \$13.95; 5 lbs. \$33.75.

1093 Dwarf Stone A very choice Tomato of dwarf habit, making a distinct tree-like growth which requires no training. Large smooth fruits of a bright scarlet-red color. The fruits average 4 in. in diameter and are about 3½ in. thick. They are juicy, fleshy, and contain comparatively few seeds. A favorite with home gardeners who want a main-crop variety of compact growth. As the plants do not vine they can be planted closely together with a corresponding increase in yield. Pkt. 10¢; ½ oz. 25¢; oz. 45¢; 4 ozs. \$1.35; ½ lb. \$2.45; lb. \$4.50; 2 lbs. \$8.35; 5 lbs. \$20.25.

Burpee's Dwarf Giant

Late or Main Crop Tomatoes (continued)

1114 True Giant Ponderosa ☉

An old and well-established Tomato which enjoys great popularity with gardeners who prefer fruits with purplish pink skin such as this variety has. The tomatoes grow to extremely large size and are full of luscious juicy flesh. The seed cavities are unusually small, which accounts for the astonishing weight of the fruits. It is not unusual for the tomatoes to weigh 12 ozs. and more, though the average runs around 9 ozs. They are deep, somewhat flattened, and have a most agreeable mild flavor. People who do not care for the acid flavor of the deep red Tomatoes will find in Ponderosa a very palatable and tasty fruit of a delightful mild flavor and a good deep pink color. Pkt. 15¢; ½ oz. 35¢; oz. 60¢; 4 ozs. \$1.80; ½ lb. \$3.30; lb. \$6.00; 2 lbs. \$11.15; 5 lbs. \$27.00.

1115 Beefsteak

This is another of the very large Tomatoes. It resembles Ponderosa in many ways except that the fruits are a rich scarlet-red color. The vigorous vines produce a great abundance of extra large size fruits which are more or less ribbed. The flesh is a beautiful deep scarlet. It is juicy, solid, and has a rich sub-acid flavor. Grown extensively by home gardeners. Pkt. 15¢; ½ oz. 35¢; oz. 60¢; 4 ozs. \$1.80; ½ lb. \$3.30; lb. \$6.00; 2 lbs. \$11.15; 5 lbs. \$27.00.

1099 The Burpee ☉

In sections where late Tomatoes will mature, gardeners will be interested in this large, luscious, pinkish red variety which is exceptionally solid, juicy, tasty, and most refreshing. The fruits measure 3¾ in. in diameter, which makes them just the right size for slicing. Stuffed, fried, or preserved, The Burpee Tomato retains the delectable flavor found in the fresh fruits. Vigorous and enormously productive. Pkt. 15¢; ½ oz. 45¢; oz. 75¢; 4 ozs. \$2.25; ½ lb. \$4.10; lb. \$7.50; 2 lbs. \$13.95; 5 lbs. \$33.75.

Orange and Yellow Tomatoes

1127 Tangerine ☉

A distinctive new Tomato—the color of a Tangerine. This new main-crop Tomato is as outstanding in quality as it is in appearance. The fruits are large and heavy, measuring 4 in. and more in diameter. They are as deep as they are high and inclined to be somewhat angular. The thin skin of the ripened fruit is a beautiful orange—the color of a fully ripened tangerine. The flesh is a lighter orange shade, somewhat more of a mellow golden yellow, which gives it a most appetizing appearance. The flavor is delightful. It is rich and tasty, of a sub-acid piquancy that stimulates the appetite. A vigorous grower. If you are looking for the most easily grown flowers, don't overlook Cosmos, Dianthus, Nasturtiums, Marigolds, Calendulas, Petunias, and Zinnias. They grow almost anywhere and with little care.

The Sweet Peas require more careful treatment but will well repay you for it. Burpee's Sweet Peas are famous the world over, and nowhere else will you find so delightful a selection as here.

Perennials are easy to grow from seed; once established they will return a hundred-fold, year after year, your small investment of time and money.

Burpee's Gladiolus and Dahlias are particularly famous. They have consistently won the most coveted prizes at the important Flower Shows and Exhibitions.

The blooming time given for the various classes will make it easy for you to plan your garden so that you will have glorious flowers all season, from the spring flowers of the Iris and Peonies to the fall flowers of the Dahlias.

Gladiolus bulbs may be planted at intervals from early spring to midsummer for a continuous succession of blooms until late fall.

Roses, Vines and Shrubs

Here is offered a selection of the most popular Hybrid Tea and Hybrid Perpetual Roses, Climbers, Baby Ramblers, and Hardy Flowering Shrubs that are best suited for the foundation planting of your home and around your lawns and gardens. The Hardy Climbers are especially fine for shading the porch and covering the arbor and fence.

We also offer here a selected list of Small Fruits.

On Selecting Varieties

In selecting varieties gardeners usually have in mind some specific object. It may be that you want a border or bed of Annuals to bloom from midsummer until frost, or it may be Perennials, Shrubs, Roses, or Vines to beautify your home-grounds.

Most flowers and plants do best if grown in the sun but there are also some which may be grown in the semi-shade. Those we have marked on the following pages with **⊙** are suited for growing in the semi-shade. Those who want plants for the rock garden will find them marked with **Ⓜ**. Plants which delight in moist soil are marked **Ⓜ**. Those which will do well even in very dry soils are marked **Ⓜ**.

The information about height and blooming season given under each class and under each variety will enable you to plan a well-arranged garden that will be a riot of color from early spring until late in the fall.

Lovely New and Rare Flowers for 1933

The great interest in new and rare flowers is just another sign that amateur gardeners in this country are now, more than ever before, taking a serious interest in gardening. The days when just a few old-fashioned flowers, planted without any forethought or design, were considered a garden have gone. Today one gardener matches his ability against that of his neighbor's to achieve a beautiful and artistic effect that expresses his own creative ability. The new and rare flowers play a most important part in this endeavor to add to one's garden a touch that is different and unusual. Though the varieties offered are new and rare, most of them are, nevertheless, easy to grow.

Six of the Finest New Annual Flowers

1596 Arctotis scapigera ☐

A colorful dwarf annual from South Africa, growing 6 to 8 in. tall and bearing throughout the summer and fall a great quantity of large, Daisy-like flowers 2½ to 3 in. across. The colors include orange, terra cotta, yellow, cream, salmon, carmine, and others. It has proved to be well adapted for growing in our climate and makes a splendid display in beds, borders, or the rock garden. Pkt. 35¢; ⅓ oz. \$1.35; ½ oz. \$2.50.

1971 Dahlia, Unwin's Dwarf Hybrids ☐

This Dahlia is very distinct. The plants make a dwarf growth 2 ft. tall and therefore require no staking. The blooms are borne in abundance. They are semi-double and include a wide range of beautiful colors, particularly pastel shades. As easily grown from seed as Asters or Zinnias. Seeds sown in March will produce blooming plants in late June that continue to flower until frost. Excellent for beds and borders, and yielding many long-stemmed flowers for cutting from late June until frost. Pkt. 35¢; ⅓ oz. 85¢; ¼ oz. \$1.50.

2180 Marigold, Guinea Gold ☐

Unbounded enthusiasm! These two words express only conservatively the reaction of gardeners to this magnificent new Marigold which surpasses anything ever created in this class. The graceful pyramidal plants grow 2 to 2½ ft. tall and bear 30 to 40 semi-double Carnation-like blooms measuring 2 to 2½ in. across. The color of the flowers is the most intense pure orange-gold imaginable. Blooms continuously throughout the summer and fall. Splendid for the garden and for cutting. Pkt. 25¢; ⅓ oz. 60¢; ¼ oz. \$1.00; ½ oz. \$1.75.

2851 Venidium fastuosum

Of the many flowers which South Africa has contributed to our gardens, this new Venidium stands out as one of the best. It is known under the popular name of **Monarch of the Veldt**. The plants grow 2 to 3 ft. tall and bear many large, Daisy-like blooms 3 to 4 in. across. The ray-petals are brilliant orange with a purple-black zone and a unique center of woolly green. Pkt. 35¢; ⅓ oz. 90¢; ½ oz. \$1.50.

2328 Nasturtium, Golden Gleam ☐

For purity and warmth of color few flowers can approach Golden Gleam Nasturtium. In addition to its rich color, the beautiful, well-rounded, double blooms of Golden Gleam are distinctly and delightfully sweet scented. The flowers measure 2½ to 3 in. across. They are borne profusely on stems 6 in. long, which makes them valuable for cutting. The plants are of semi-running habit, fine for beds and borders. Order early as the supply of seed is limited and we expect a great demand. Pkt. 25¢; ½ oz. 60¢; oz. \$1.00.

Antirrhinum—Snapdragon ☐

BURPEE'S

Glorious ASTERS

Annual Asters are universal favorites for their wide range of beautiful colors and forms, the profusion of their blooms, their value for garden display and cutting, their long keeping qualities. You may have a continuous succession of flowers from early summer until frost by planting early, midseason, and late-flowering varieties. The Asters offered here will come into bloom in about the following order: **EARLY**—Queen of the Market, Royal; **MIDSEASON**—King, Astermum, Crego, California Giant, California Sunshine, Single Giants; **LATE**—American Beauty, American Late Branching, Mammoth Peony Flowered.

Asters are easy to grow. They prefer rich, well-drained soil, plenty of sunshine and ample moisture, although the ground must not be soggy. Plant in a different location each year. Asters bloom from three to five months after seed is sown, varying according to variety and climate. For early blooms sow seed indoors six weeks before outdoor planting time. When seedlings are two or three inches tall, transplant to pots and transfer to open ground when soil is warm. For later blooms, sow seed in the open as soon as the soil is dry enough to work. Thin out seedlings, allowing 12 in. between upright growing varieties and 18 in. between branching varieties.

American Beauty Asters

Large Double Blooms—Long Stems

The earlier-flowering strain of the American Beauty type comes into bloom a little before the American Late Branching. Plants are of branching habit and very vigorous. They grow 2 to 2½ ft. tall, spread 2½ ft. wide, and bloom profusely. The flowers are globular, fully double, with incurved petals, and very large, 4 in. or more in diameter. Strong stems 15 to 20 in. long make them especially desirable for cutting. The flowers come in a wide range of lovely colors.

Pansies*

2513 Burpee Blend of Giant Fancy Pansies

There are few flowers in which quality of the strain counts as much as in Pansies. We believe that the Burpee Blend of Giant Fancy Pansies deserves to be placed at the head of our list because it is a mixture that has been selected with the utmost care and discrimination. It contains the largest and most beautiful of all blotched Pansies. They are heavy, thick, well waved, and crinkled at the edges. Pkt. 35¢; ⅓ oz. 85¢; ⅓ oz. \$1.50; ⅓ oz. \$2.75; ⅓ oz. \$5.25; oz. \$10.00.

2454 Oregon Giants

This strain of Pansies, which originated in Oregon, distinguishes itself by being extra long stemmed. The flowers are somewhat more flattened than those of other Giant Pansies but this characteristic adds considerably to the size of the blooms which, if well grown, measure 4 in. across. The originator exhibited such blooms at the Oregon Flower Show in 1928. A gracefully waved edge adds beauty to the otherwise flat blooms. Includes a wonderful range of colors. Pkt. 50¢; ⅓ oz. \$1.35; ⅓ oz. \$2.50; ⅓ oz. \$4.75; ⅓ oz. \$9.25; oz. \$17.50.

2500 Mastodon Giants In this mixture of Giant Pansies we have a strain which shows a remarkable degree of heavy ruffling and crinkling. The flowers are very large and well shaped. They are composed of an abundance of thick texture. The colors range from pure white to the deepest mahogany, including lovely lavender, rose, cerise, and light blue shades not found in any other strain. The plants are compact, bushy, and free blooming. Pkt. 35¢; ⅓ oz. \$1.00; ⅓ oz. \$1.85; ⅓ oz. \$3.50; ⅓ oz. \$6.50; oz. \$12.00.

2463 Giant Ruffled Masterpiece This European type of Pansy enjoys the greatest popularity all over the world. It belongs to the crinkled and heavily ruffled type, and the blooms have so much substance that they have the appearance of double flowers. The color range is very beautiful and runs toward the rich and deeper shades. Pkt. 20¢; ⅓ oz. 40¢; ⅓ oz. 70¢; ⅓ oz. \$1.25; ⅓ oz. \$2.10; oz. \$3.75.

Phlox is exceedingly easy to grow. It does well in any average garden soil and blooms profusely from midsummer until frost. The plants grow 15 in. tall and make a splendid display in the garden, arranged either in beds or as borders. Burpee's Giant Spencer or Orchid-Flowered SWEET PEAS

Burpee's Sweet Peas are world-famous. They are grown on Burpee's Floradale Farms near Lompoc, California, where soil and weather conditions combine to produce well-ripened, full of vitality seeds that will give a magnificent display of flowers. Sweet Peas do best during cool weather and for that reason sow the seed as early in the spring as the ground can be prepared. Cover the seed with 2 in. of fine soil, and when the plants begin to vine, supply supports for them to climb upon. Deep preparation of the soil is a great advantage, though not necessary where the soil is naturally fertile and well drained. Water freely during dry spells. One oz. of seed will give a row about 15 ft. long. Varieties marked **⊙** are particularly fine.

The Early or Winter-Flowering Sweet Peas

These splendid Sweet Peas were, with a few exceptions, all introduced by Burpee. They are valuable to florists for greenhouse culture and are also adaptable to outdoor planting in warmer climates, such as certain sections of our own southern states, Australia, and South Africa. They do well in many sections where the summer-flowering varieties cannot be grown successfully. In cooler climates they are of value for the garden because they bloom a week or ten days earlier.

BURPEE'S ZINNIAS

Zinnias are one of the most universally planted of all annuals. They are hardy and so easy to grow, doing well almost anywhere with little care. They offer many lovely colors, and their various types meet every garden need for beds, borders, and cut-flowers. Burpee's Zinnias are far superior to the old-fashioned Zinnias commonly known as "Youth and Old Age" because they offer a wider range of delicate as well as rich colors, have much larger blooms, and are more handsome in shape. Zinnias flower profusely and continuously from midsummer to late autumn. The foliage is substantial and decorative. For the finest double flowers, plant in a sunny location with good soil and plenty of water. Early blooms can be had by sowing the seed indoors about six weeks before outdoor planting time. Regular sowings should be made outdoors as soon as the soil is dry enough to be worked and all danger of frost has passed. Thin out the seedlings or transplant, allowing 18 to 24 in. between plants.

One of Our Great Specialties

Burpee's Gold Medal Dahlias

The Dahlias of today, which you may order for your garden, far surpass what were considered even the best exhibition Dahlias just a few years ago. As a Dahlia admirer, be sure to plant Burpee's Gold Medal Dahlias this year, and see the difference. Whether you select the massive Decorative type or the small Pompon varieties which recently are winning so many admirers, you will be delighted. Thus: **F. D.** = **Formal Decorative**; **I. D.** = **Informal Decorative**; **C.** = **Cactus**; **S. C.** = **Semi-Cactus**; **Po** = **Pompon**.

Quality Farm Seeds

When planting a field, every farmer has in mind just one object—to obtain the best crop possible. Better quality, a little extra yield beyond the average crop—these mean extra dollars and cents at harvest time. The first requirement for a good crop is good seed. Experience proves it pays to use only seeds of known quality. Cheap seeds waste the time, the labor, and the fertilizer used in preparation for the crop, and no after-care in cultivation can make the crop what it might have been. Burpee's Seeds—the best that can be grown—are widely used by progressive farmers everywhere.

Root crops—one of the most important classes of farm products—should receive more attention. Their high food value makes them very desirable for stock feeding all the year round. They are easily stored throughout the winter. **Mangel Wurzels** and **Sugar Beets** are listed on page 15; **Carrots for Stock Feeding**, on page 25; **Turnips** and **Rutabagas**, on page 58.
